

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

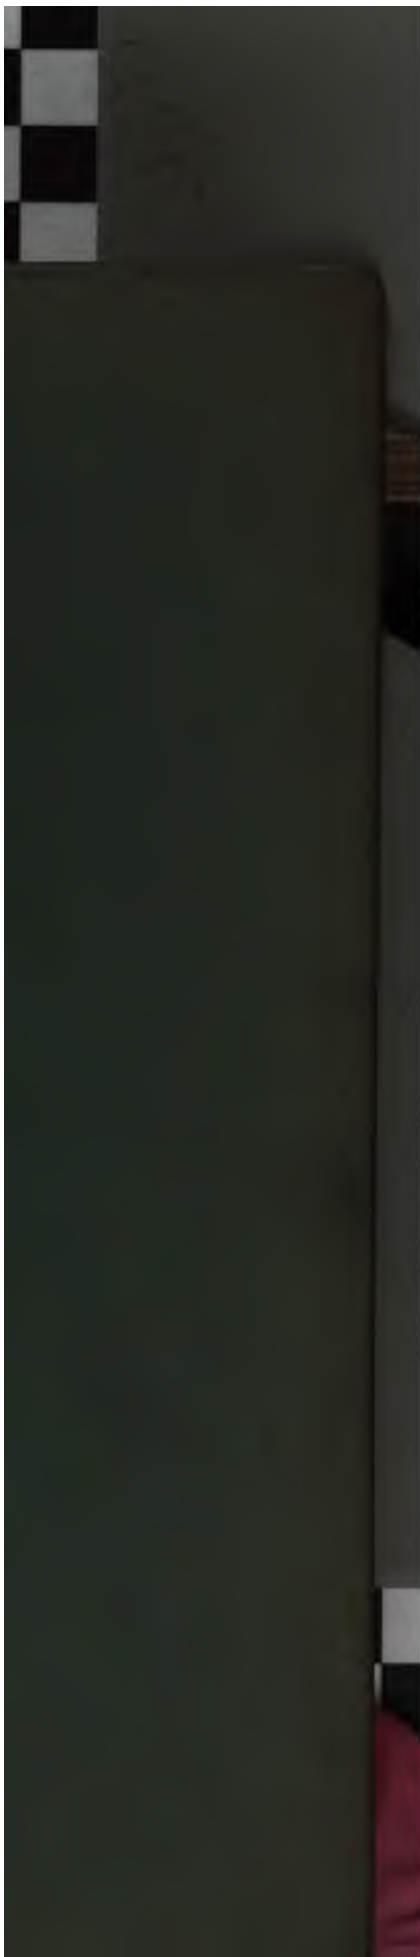

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

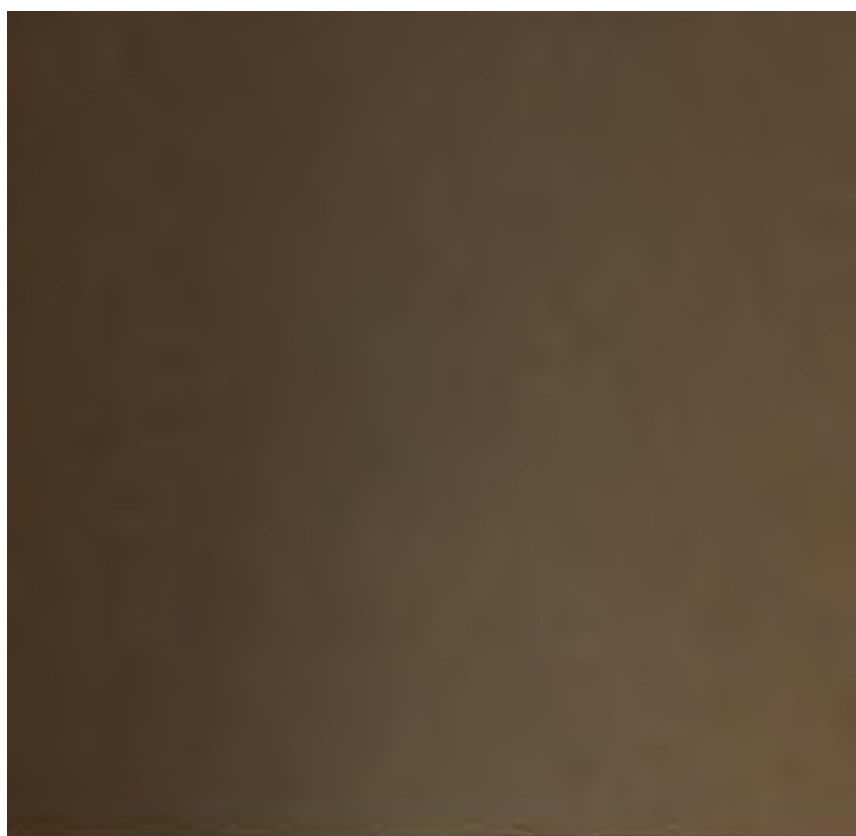

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

TWENTY-FIFTH ANNUAL REPORT
TO THE
LEGISLATURE OF VERMONT,
RELATING TO THE
REGISTRY AND RETURNS
OF
BIRTHS, MARRIAGES, AND DEATHS
IN THE STATE
FOR THE YEAR ENDING DECEMBER 31, A.D. 1881.

PREPARED BY GEORGE NICHOLS,
SECRETARY OF STATE.

BOSTON:

YNA 1814

REPORT.

STATE OF VERMONT.

OFFICE OF SECRETARY OF STATE,
NORTHFIELD, Aug. 1, 1883.

TO THE GENERAL ASSEMBLY.

In compliance with the requirement of law, I have the honor of submitting herewith the Twenty-fifth Annual Report relating to the Births, Marriages, and Deaths that have occurred in the State for the year ending Dec. 31, 1881.

The work has been prepared with great care, and is believed to be strictly accurate, as shown by the returns received from the several towns in the State respectively. Full returns have been received, which add very much to the practical value of the work; as the "Results and Observations" deduced from such returns, and which has been prepared by Dr. L. C. Butler of Essex, who for the last fifteen years has had this part of the report under his immediate supervision, cannot fail to commend itself, in a higher degree than ever before, to those interested in the important study of vital statistics.

Respectfully submitted.

GEORGE NICHOLS,

Secretary of State.

CONTENTS.

TABLES.

PAGE

| | | |
|-------|---|--------|
| I. | GENERAL ABSTRACT. — Population in 1872, Births, Marriages, and Deaths, registered in each town, in 1881, distinguishing the sex and parentage of Births; the nativity of Marriages; the sex, aggregate and average ages; and the percentage of deaths | 2-17 |
| | <i>Recapitulation.</i> — Births, Marriages, and Deaths by counties | 18-19 |
| II. | BIRTHS. — Showing the number of each sex in the several counties during each month, with percentage | 20-21 |
| | <i>A. Supplement.</i> — Plural Births by counties, by months, and by sex | 22 |
| | <i>B. Supplement.</i> — Illegitimate Births by counties, by months, and by sex | 23 |
| III. | MARRIAGES. — By counties and by months | 24 |
| IV. | PERSONS MARRIED. — By ages and by conjugal conditions, ... | 25-27 |
| V. | DEATHS. — By counties, by months, by sex, and parentage | 28-29 |
| VI. | DEATHS ACCORDING TO AGE. — Showing the number of each sex at different ages in each town and county, with the population and percentage | 30-75 |
| | <i>Recapitulation.</i> — Of Deaths, according to age and sex, with percentage | 76-77 |
| VII. | CAUSES OF DEATH. — Alphabetically arranged, showing the number of each sex dying at different ages during the several months, with the various diseases | 78-88 |
| VIII. | CLASSIFICATION OF THE CAUSES OF DEATH. — By counties, with the totals and percentage | 90-97 |
| IX. | OCCUPATION. — Showing the number of those pursuing different avocations, the number of deaths in each, the ratio to the living, and the aggregate and average ages of those dying | 98-100 |

| | |
|---|----|
| X. DIVORCES. — Exhibiting the number granted in each county, with the causes therefor; also, the ratio of divorces to marriages | |
| XI. DIVORCES. — Exhibiting the number granted in each county, arranged with special reference to the libellants, ... | 10 |
| RESULTS AND OBSERVATIONS | |
| General Summary | |
| BIRTHS | |
| Sex, with ratio thereof | |
| Births to population, by counties, and number in each county | |
| Number of births for each quarter | |
| Plural births | |
| Illegitimate births | |
| Stillborn | |
| Parentage, by counties | |
| MARRIAGES | |
| In quinquennial periods | |
| Social condition of those married | |
| Nativity of those married | |
| DIVORCES | |
| DEATHS | |
| Ages, average, with numbers at different ages | |
| Sex, nativity, season | |
| CAUSES OF DEATH, General Classification | |
| Table showing the number of decedents from each class, in quinquennial periods | |
| Mortuary table, arising from the sixteen principal causes, since 1857, in quinquennial periods | |
| CAUSES OF DEATH IN DETAIL | |
| OLD AGE, remarks upon | |
| PARALYSIS, remarks upon | |
| HEART DISEASE, by sex and ages | |
| PNEUMONIA, remarks upon | |
| Mortuary table showing decedents by counties, the per cent and number of each sex | |

RESULTS AND OBSERVATIONS.

1881.

GENERAL SUMMARY.

DURING the year ending Dec. 31, 1881, the whole number of births recorded in the State was six thousand seven hundred and sixty-one (6,761), of which three thousand four hundred and ninety (3,490) were males, and three thousand two hundred and sixty-six (3,266) were females, — a difference of two hundred and twenty-four (224) in the proportion of the sexes. In 1880 the difference was one hundred and forty-four (144). Of five (5) the sex is not stated.

During the same period, two thousand seven hundred and sixty-three (2,763) couples were married, — a number greater by sixty-six couples than were reported in 1880.

The number of decedents for the same period was five thousand five hundred and fifty-seven (5,557), of which two thousand six hundred and ninety-three (2,693) were males, and two thousand eight hundred and fifteen (2,815) were females. The sex of forty-nine (49) is reported as "unknown."

Compared with 1880, the births were one hundred and thirty-nine (139) greater than in that year. The decedents were increased by two hundred and ninety-seven (297), and the marriages by sixty-six (66), couples. The increase of the population of the State by births during the year was one thousand two hundred and four (1,204).

The population of the State by the census of 1880 is 332,286. There was, therefore, during the year, one birth to every 49.1 of the population, against one to every 50 in 1880. One person to every 60 was married during the year. There was one decedent to every 59 of the population, against one to every 63.1 in 1880, and one to every 64.3 in 1879. These figures show an increase of mortality in the State for the past two years.

The following table groups together the main facts in the registration of Births, Marriages, and Deaths during the twenty-five years now covered by these reports. The first twenty years are given in quinquennial periods: —

| YEARS. | Whole No. of Births. | Stillborn. | Living Births. | Marriages. | Deaths. |
|-----------------|----------------------|------------|----------------|------------|---------|
| 1857-1861 . . . | 32,682 | 645 | 32,037 | 11,391 | 18,753 |
| 1862-1866 . . . | 27,512 | 383 | 27,129 | 11,343 | 24,538 |
| 1867-1871 . . . | 36,260 | 828 | 35,432 | 14,109 | 22,313 |
| 1872-1876 . . . | 35,950 | 1,018 | 34,932 | 13,538 | 25,914 |
| 1877 | 7,375 | 197 | 7,178 | 2,615 | 4,992 |
| 1878 | 6,970 | 235 | 6,635 | 2,770 | 4,896 |
| 1879 | 6,844 | 251 | 6,592 | 2,708 | 5,164 |
| 1880 | 6,632 | 228 | 6,404 | 2,697 | 5,260 |
| 1881 | 6,761 | 240 | 6,521 | 2,763 | 5,557 |
| Totals | 166,986 | 4,031 | 162,860 | 63,934 | 117,387 |
| Average . . . | 6,679.4 | 161.2 | 6,274.4 | - | 4,695.4 |

BIRTHS.

In the following table we group together the whole number of births registered in the State for twenty-five years, 1857-1881 inclusive, together with the annual birth-rate, the average birth-rate for four quinquennial periods, population to one birth, and number of each sex for the same periods:—

| YEARS. | Whole No. | Average Birth-rate. | Population to 1 Birth. | Males. | Females. | Unknown. |
|-----------------|-----------|---------------------|------------------------|--------|----------|----------|
| 1857-1861 . . . | 32,682 | 2.06 | 48.4 | 16,506 | 15,724 | 452 |
| 1862-1866 . . . | 27,512 | 1.77 | 56.6 | 14,126 | 13,215 | 171 |
| 1867-1871 . . . | 36,260 | 2.05 | 45.6 | 18,710 | 17,110 | 440 |
| 1872-1876 . . . | 35,950 | 2.16 | 45.9 | 18,417 | 17,480 | 53 |
| Annual. | | | | | | |
| 1877 | 7,375 | 2.23 | 45.9 | 3,774 | 3,586 | 15 |
| 1878 | 6,970 | 2.15 | 47.0 | 3,588 | 3,374 | 8 |
| 1879 | 6,844 | 2.07 | 48.3 | 3,597 | 3,236 | 11 |
| 1880 | 6,632 | 2.05 | 50.0 | 3,384 | 3,240 | 8 |
| 1881 | 6,761 | 2.03 | 49.1 | 2,693 | 2,815 | 49 |
| Totals | 166,986 | - | - | 90,805 | 86,780 | 1,207 |
| Average . . . | 6,679.4 | - | - | 3,632 | 3,471 | - |

From this table it appears that the whole number of births in the State during the twenty-five years covered by these registration reports is one hundred and sixty-six thousand nine hundred and eighty-six (166,986), which exceeds the whole number of decedents in the same period by fifty-one thousand five hundred and ninety-nine (51,599). These figures, still-births excluded, indicate an annual increase of population of the State, for the past twenty-five years, of

about two thousand, an increase not justified by the official figures of the census. Those figures show an increase in population from 1860 to 1870 of 15,453 only, and from 1870 to 1880 of 1,735, thus accounting for only a small proportion of the increase indicated by the difference between the number of births and of decedents during the same periods. Besides this, the average annual number of births for the same period was six thousand six hundred and seventy-nine (6,679), which exceeds the annual average of decedents by two thousand and sixty-four (2,064). The solution of this problem is doubtless in the fact that emigration has depleted the State more rapidly than births have increased its population.

SEX. — Of the six thousand seven hundred and sixty-one (6,761) births reported in 1881, three thousand four hundred and ninety (3,490), were males, and three thousand two hundred and sixty-six (3,266) were females, or 104 males to each 100 females, or 52.4 males to 47.6 females. The following table shows the proportion of sexes born in the State during the years 1857–1882 inclusive, the average only of five quinquennial periods being given: —

| YEARS. | 1857–61. | 1862–66. | 1867–71. | 1872–76. |
|---------------------------------|-----------------------------------|-----------------------------------|-----------------------------------|-----------------------------------|
| Males to each 100 females . . . | Average.
104.7 | Average.
106.7 | Average.
108.8 | Average.
105.3 |
| Or, | 52.4 males
to 47.6
females. | 53.4 males
to 46.6
females. | 67.4 males
to 32.6
females. | 52.6 males
to 47.4
females. |

| YEARS. | 1877. | 1878. | 1879. | 1880. | 1881. |
|---------------------------------|-----------------------------------|-----------------------------------|-----------------------------------|-----------------------------------|-----------------------------------|
| Males to each 100 females . . . | 107.4 | 106.4 | 109.8 | 104.0 | 104.0 |
| Or, | 53.7 males
to 46.3
females. | 58.2 males
to 46.8
females. | 59.8 males
to 41.2
females. | 52.4 males
to 47.6
females. | 52.4 males
to 47.6
females. |

The counties were prolific in proportion to population as follows: —

| Population. | Counties. | | | | | |
|-------------|------------------|--|--|--|--|--|
| 32,792 | Chittenden . . . | 872, or 1 birth to every 37.6 of its population. | | | | |
| 30,225 | Franklin . . . | 726, " " 41.6 " " | | | | |
| 7,931 | Essex . . . | 188, " " 42.2 " " | | | | |
| 41,829 | Rutland . . . | 939, " " 44.5 " " | | | | |
| 23,607 | Caledonia . . . | 512, " " 46.1 " " | | | | |
| 12,684 | Lamoille . . . | 272, " " 46.8 " " | | | | |
| 4,124 | Grand Isle . . . | 86, " " 48. " " | | | | |
| 22,083 | Orleans . . . | 452, " " 48.9 " " | | | | |
| 24,173 | Addison . . . | 466, " " 51.8 " " | | | | |
| 21,950 | Bennington . . . | 419, " " 52.3 " " | | | | |
| 23,525 | Orange . . . | 396, " " 59.4 " " | | | | |
| 26,763 | Windham . . . | 446, " " 60. " " | | | | |
| 35,196 | Windsor . . . | 577, " " 61. " " | | | | |
| 25,404 | Washington . . . | 410, " " 62. " " | | | | |

The greatest number of births recorded in one month was September, 625; last year, August, 611. Next in order are July, 622; August, 586; October, 584; April, 582; May, 573; March, 565; December, 560; June, 543; November, 542; February, 518; January, 440. The number for the third quarter is the largest, 1,833; next in rank is the second, 1,697; then the fourth, 1,686; and the first, 1,523. The births in the last half of the year exceed the first by 299; last year, by 148. The order of counties was, Rutland, 939; Chittenden, 872; Franklin, 726; Windsor, 577; Caledonia, 512; Addison, 466; Orleans, 452; Windham, 446; Bennington, 419; Washington, 410; Orange, 396; Lamoille, 272; Essex, 188; Grand Isle, 86.

The following table shows the number of births for each quarter for the twenty-five years of these reports, the aggregate of the first four quinquennial periods being given:—

| YEARS. | First Quarter. | Second Quarter. | Third Quarter. | Fourth Quarter. | Totals. |
|---------------------|----------------|-----------------|----------------|-----------------|---------|
| 1857-1861 | 7,133 | 7,918 | 8,571 | 8,579 | 32,201 |
| 1862-1866 | 6,449 | 6,684 | 7,346 | 6,788 | 27,277 |
| 1867-1871 | 7,938 | 9,140 | 9,571 | 9,337 | 35,986 |
| 1872-1876 | 8,146 | 9,100 | 9,748 | 8,920 | 35,914 |
| 1877 | 1,617 | 1,875 | 2,047 | 1,831 | 7,370 |
| 1878 | 1,535 | 1,699 | 1,867 | 1,870 | 6,970 |
| 1879 | 1,612 | 1,704 | 1,738 | 1,822 | 6,844 |
| 1880 | 1,540 | 1,707 | 1,591 | 1,891 | 6,642 |
| 1881 | 1,523 | 1,698 | 1,833 | 1,686 | 6,739 |
| Totals | 37,493 | 41,525 | 44,312 | 42,724 | 165,943 |

The preponderance of births in the last six months of the year is eight thousand and eight (8,008).

PLURAL BIRTHS.—One hundred and thirty-six plural births are reported for 1881, which is an increase of 38 over 1880: 63 were males, and 73 were females, or one to about 50 of all births. Five of these cases were triplets,—two each in Orange and Windham Counties in the month of January, and one in Rutland County in November. The largest number of these births was in Chittenden County, 28; then Rutland, 18; Franklin, 16; Orange, 14; Bennington, 12; Addison, Caledonia, and Washington, each 8; Orleans and Windham, each 7; Windsor, 6; Lamoille, 4. Essex and Grand Isle have no part nor lot in this distinction of duplicate and triplicate babies.

The following table exhibits the number of these births, their sex, and the number to all births for twenty-five years:—

| YEARS. | 1857-61. | 1862-66. | 1867-71. | 1872-76. | 1877. | 1878. | 1879. | 1880. | 1881. | Totals. |
|------------------------|----------|----------|----------|----------|-------|-------|-------|-------|-------|---------|
| Number | 627 | 453 | 697 | 629 | 109 | 105 | 101 | 98 | 136 | 2,955 |
| Males | 351 | 192 | 386 | 314 | 63 | 46 | 61 | 47 | 63 | 1,523 |
| Females | 279 | 201 | 311 | 310 | 46 | 59 | 40 | 51 | 73 | 1,370 |
| Number to all births . | 52.0 | 64.0 | 30.5 | 61.3 | 67.6 | 66.3 | 65.0 | 67.7 | 50.0 | |

ILLEGITIMATES.—Forty-nine illegitimates are reported in 1881, against 55 in 1880, of which 20 were males, and 28 were females. Two were twin cases. The counties are all represented in this list save Grand Isle; Washington taking the lead in number (7), the others varying from one to six, Bennington having the honor of the twins. The whole number of these births for twenty-five years is 1,325, of which 675 were males, and 635 were females. Of 15 the sex is not stated.

STILLBORN.—The statistics on this point are gathered from the registration of deaths. The number for 1881 was two hundred and forty-two (242), an increase from 1880, when it was two hundred and twenty-eight (228). Of these, one hundred and thirty-five (135) are registered as males, and one hundred and five (105) as females, and two as unknown.

PARENTAGE.—Four thousand eight hundred and ninety-eight (4,898) births are recorded as American, and one thousand seven hundred and fourteen (1,714) as foreign, with one hundred and forty-nine (149) as unknown. The largest number of those recorded as foreign was in Rutland County, 322; then Chittenden County, 296;

Franklin, 257; Caledonia, 135; Orleans, 122; Bennington, 95; Addison, 85; Washington, 68; Windham, 67; Essex, 64; Windsor, 60; Orange, 54; Lamoille, 40; Grand Isle, 26. The whole number of births recorded as of American parentage for twenty-five years past, 1857-1881 inclusive, is one hundred and three thousand five hundred and three (103,503); as of foreign parentage, forty-four thousand and eighty-seven (44,087). The births to each one thousand of the American population have varied from 13.4 to 17.8. Among the foreign population, the births have varied from 39.5 to 59.5.

MARRIAGES.

The whole number of marriages recorded during the year 1881 was two thousand seven hundred and sixty-three (2,763) couples, or five thousand five hundred and twenty-six (5,526) persons, a slight increase from 1880.

Of the persons married, four thousand six hundred (4,600) were of American, and eight hundred and fifty-two (852) of foreign, parentage. Of seventy-four (74) the nativity is not reported. This does not indicate so extensive a mixing up of races and nativities as appears in other States. Franklin, Orleans, and Chittenden take the lead in marriages among the foreign population, comprising more than one-half of the whole number. The order of counties, in the number of marriages reported, is as follows: Franklin, 313; Rutland, 272; Orleans, 261; Windsor, 257; Chittenden, 245; Windham, 238; Addison, 217; Washington, 208; Caledonia, 205; Orange, 177; Bennington, 161; Lamoille, 103; Essex, 89; Grand Isle, 17.

The following table shows the number of marriages in each of the four quinquennial periods, 1857 to 1876, and for each year since the latter period, with the ratio to the population, and the nativity of the persons married:—

| * YEARS. | 1857-61. | 1862-66. | 1867-71. | 1872-76. | 1877. |
|------------------------|----------|----------|----------|----------|-------|
| Marriages | 10,792 | 11,345 | 14,109 | 13,539 | 2,615 |
| No. of persons | 21,584 | 22,690 | 28,218 | 27,078 | 5,230 |
| Average. | 73.3 | 71.6 | 56.2 | 61.0 | 63.2 |
| Ratio of population . | | | | | |
| American | 13,154 | 14,198 | 21,264 | 22,525 | 4,370 |
| Foreign | 1,832 | 2,047 | 3,833 | 4,151 | 780 |
| Unknown | 6,598 | 6,441 | 2,940 | 401 | 80 |

| YEARS. | 1878. | 1879. | 1880. | 1881. | Totals. |
|-------------------------|-------|-------|-------|-------|---------|
| Marriages | 2,770 | 2,708 | 2,687 | 2,763 | 63,328 |
| No. of persons | 5,540 | 5,416 | 5,394 | 5,526 | 126,656 |
| Ratio of population . . | 70.3 | 61 | 61.0 | 60 | |
| American | 4,717 | 4,597 | 4,507 | 4,600 | 84,932 |
| Foreign | 729 | 743 | 814 | 852 | 15,781 |
| Unknown | 3 | - | 73 | 74 | 16,619 |

The following table shows the whole number of persons of each sex married in 1881 at the different periods of life named : —

| 1880. | Under 20. | 20 to 25. | 25 to 30. | 30 to 35. | 35 to 40. | 40 to 45. | 45 to 50. | 50 to 55. | 55 to 60. | 60 to 65. | 65 to 70. | Over 70. | Unknown. |
|----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|----------|----------|
| Males, | 70 | 1,076 | 804 | 311 | 152 | 85 | 57 | 61 | 40 | 38 | 27 | 23 | 19 |
| Females, | 822 | 1,094 | 399 | 156 | 88 | 56 | 46 | 40 | 11 | 12 | 3 | 6 | 30 |
| Totals, | 892 | 2,170 | 1,203 | 467 | 240 | 141 | 103 | 101 | 51 | 50 | 30 | 29 | 49 |

Of the marriages recorded during the year, two thousand one hundred and six (2,106) were the first marriage of both parties ; one hundred and eighteen (118) were the first of men, but subsequent of women ; three hundred and nineteen (319) were the subsequent of men, but first of women ; two hundred and eight (208) were the subsequent marriage of both parties ; and of twelve (12) the condition of parties is not stated. Of the first marriage of both parties, all save seventeen were under forty-five years of age. Of the first of men, but subsequent of women, all save one were under fifty years of age. Of the subsequent marriage of both parties, the ages seem to be very evenly balanced. The largest number of marriages occurred in October, November, and December ; and, for the six months beginning with October and ending with March, the number was one thousand five hundred and fifty-nine (1,559).

DIVORCES.

During the year 1881, one hundred and sixty-eight (168) divorces were granted by the courts of Vermont, — an increase of thirty-nine over 1880. The ratio of divorces to marriages in 1876 was one to

sixteen of all marriages; in 1877 it was one to fifteen; in 1878 it was one to fourteen; in 1879, one to twenty-one; in 1880, one to twenty; and in 1881 it was one to every sixteen. In the year 1877 the number of divorces granted for "adultery," the only cause for divorce recognized by the Scriptures, was *twenty-five* of the one hundred and seventy-five granted. In 1878 the number was *forty-three* of the one hundred and ninety-seven, in 1879 the number was *twenty* of the one hundred and twenty-six, in 1880 the number was *seventeen* of the one hundred and twenty-nine, in 1881 the number was *forty* of the one hundred and sixty-eight. Thus, during the last five years, *one hundred and forty-five* only of the seven hundred and ninety-five divorces have been granted for adultery. The others have been granted for "intolerable severity" (oftentimes, no doubt, a "put-up job" to accomplish a wicked purpose), for "desertion," "refusal to support," and other like frivolous "causes," so termed. In forty-eight of the cases in 1881, the "husband" was the "libellant," and, in one hundred and twenty, the "wife."

The counties rank as follows in this shameful exhibition: Lamoille, one in *five*; Grand Isle, one in *eight*; Rutland, one in *eleven*; Windsor, one in *twelve*; Addison, one in *fifteen*; Washington, one in *sixteen*; Orange, one in *seventeen*; Caledonia, one in *eighteen*; Bennington, one in *twenty*; Windham, one in *twenty-one*; Franklin, one in *twenty-two*; Chittenden, one in *twenty-four*; Orleans, one in *twenty-nine*; and Essex, the banner county, one in *forty-four*, having only *two* cases. The county having the largest number of divorce cases before its courts was Rutland, 24; the next, Windsor, 20; the next, Lamoille, 19. The change in the law has lessened the number of divorce cases somewhat; but it needs a more rigorous enforcement of its provisions to prevent the nauseating, disgusting, and demoralizing exhibitions of conjugal infelicity and infidelity which are sometimes displayed in the consideration of these cases before our courts. It would seem that a just regard for decency and morality would lead the courts before whom these cases are tried, to shut out from the trial everybody save the parties immediately concerned in them, and especially the young people, whose prurient curiosity is excited to witness the nasty exhibition.

DEATHS.

The whole number of decedents reported in 1881 was five thousand five hundred and fifty-seven (5,557), against five thousand two hundred and sixty (5,260) in 1880. The number per quarter was one thousand three hundred and eighty-nine (1,389); per month, four hundred and sixty-three (463); per week, one hundred and six and eight-tenths (106.8); per day, a fraction over fifteen.

The following table shows the whole number of decedents in quinquennial periods during the twenty years, 1857 to 1876 inclusive, and for each year since that period, with per cent ratio of deaths to the living, and the average age of those who have died : —

| YEARS. | 1857-61. | 1862-66. | 1867-71. | 1872-76. |
|-------------------------|----------|----------|----------|----------|
| Number of Decedents . . | 18,753 | 24,538 | 22,313 | 25,914 |
| | Average. | Average. | Average. | Average. |
| Per cent | 1.18 | 1.56 | 1.44 | 1.55 |
| Living to One Death . . | 83.8 | 65. | 71.8 | 63.6 |
| Average Age | 36.45 | 33.88 | 37.10 | 37.21 |

| YEARS. | 1877. | 1878. | 1879. | 1880. | 1881. |
|-------------------------|-------|-------|-------|-------|-------|
| Number of Decedents . . | 4,992 | 4,896 | 5,164 | 5,260 | 5,557 |
| Per cent | 1.51 | 1.45 | 1.56 | 1.58 | 1.67 |
| Living to One Death . . | 66.2 | 68. | 64.3 | 63.3 | 59.7 |
| Average Age | 41.26 | 42.01 | 41.93 | 41.47 | 39.49 |

The total number of decedents during the twenty-five years covered by these Registration Reports was one hundred and seventeen thousand three hundred and eighty-seven (117,387). The average annual number of decedents for the same period was four thousand six hundred and ninety-five and four-tenths (4,695.4), or an average of one to every 70.7 of the population by the census of 1880. The death-rate for the year was 1.67, against 1.57 for 1880.

AGES. — The average age of all the decedents in 1881 was 39.49, against 41.47 for 1880; showing that, while the number of decedents has increased, the mortality has been among a younger class. The greatest average by counties was Windsor, 48.07; last year, Orange, 49.15; then follow, Orange, 46.87; Windham, 45.05; Addison, 44.72; Lamoille, 41.42; Washington, 40.96; Essex, 36.91; Orleans, 36.25; Caledonia, 36.20; Bennington, 35.30; Rutland, 33.53; Chittenden, 33.07; Franklin, 32.36; Grand Isle, 28.72.

The decedents under one year of age numbered nine hundred and eighty-four (984); last year, nine hundred and fifty (950), — showing considerable increase in the mortality of this class. Deducting two hundred and forty-two "stillborn," the decedents of this age from disease were seven hundred and forty-two (742), or more than one-eighth of the entire mortality of the State. The following table shows the mortality of the State at different ages during the five years, 1877-1881 inclusive : —

| Under 1. | 1 to 2. | 2 to 3. | 3 to 4. | 4 to 5. | 5 to 10. | 10 to 15. | 15 to 20. | 20 to 25. | 25 to 30. | 30 to 35. | 35 to 40. | 40 to 45. | 45 to 50. | 50 to 55. | 55 to 60. | 60 to 65. | 65 to 70. | 70 to 75. | 75 to 80. | 80 to 85. | 85 to 90. | 90 to 95. | 95 and over. | Unknown. | TOTALS. |
|----------|---------|---------|---------|---------|----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|--------------|----------|---------------|
| 984 | 184 | 123 | 94 | 69 | 239 | 154 | 183 | 243 | 227 | 166 | 160 | 171 | 172 | 154 | 192 | 240 | 299 | 397 | 404 | 350 | 191 | 89 | 31 | 45 | 1881, 5,557 |
| 950 | 200 | 120 | 80 | 58 | 183 | 117 | 177 | 226 | 181 | 171 | 165 | 125 | 156 | 168 | 203 | 259 | 303 | 366 | 410 | 322 | 187 | 74 | 28 | 31 | 1880, 5,260 |
| 843 | 187 | 120 | 83 | 69 | 217 | 146 | 201 | 192 | 211 | 174 | 137 | 146 | 146 | 175 | 199 | 227 | 284 | 362 | 413 | 302 | 187 | 79 | 26 | 38 | 1879, 5,164 |
| 819 | 178 | 123 | 104 | 54 | 206 | 124 | 171 | 203 | 175 | 138 | 135 | 156 | 118 | 155 | 177 | 226 | 287 | 369 | 398 | 261 | 184 | 58 | 33 | 44 | 1878, 4,896 |
| 814 | 191 | 132 | 104 | 74 | 273 | 131 | 198 | 226 | 172 | 148 | 143 | 151 | 143 | 155 | 176 | 208 | 294 | 324 | 348 | 271 | 186 | 62 | 25 | 42 | 1877, 4,992 |
| 4,410 | 940 | 618 | 465 | 324 | 1,118 | 672 | 930 | 1,060 | 966 | 797 | 740 | 749 | 735 | 807 | 947 | 1,160 | 1,467 | 1,818 | 1,973 | 1,506 | 935 | 356 | 143 | 200 | 5 yrs, 25,869 |

From this table it appears that the number of decedents under one year of age (4,410) has been more than one-sixth of the whole mortality of the State, that the number of decedents under five years of age (6,757) was more than one-fourth of the whole, and that the number of persons who die in infancy and early childhood (under fifteen, 8,547) is fully one-third of the entire mortality of the State. These are facts which ought to awaken earnest investigation, both as to the cause and the remedy. We confidently believe there is no substantial reason for this large mortality among the children of the State. If it be said they die of those diseases which are peculiar to infancy and childhood, that they are specially subject to the fatal epidemics of scarlatina, diphtheria, etc., that sometimes sweep over the State like a western cyclone, it is admitted; but, with the present knowledge of the causes and means of prevention of these epidemics, their mortality can be reduced by hundreds, if not by thousands, and their destructive ravages mitigated, if not stayed. These epidemics can be permitted to run riot among the families of the State, clothing them with the habiliments of mourning for their loved dead, or their deadly sting can be extracted. Hygienic and sanitary measures, sanctioned by law, and carried into effect by its strong arm, will accomplish this "consummation devoutly to be wished." And if the fathers and mothers of the State were as solicitous for the lives and health of their children as they are for their horses and cattle and sheep, and were as ready to provide measures by law for their protection from the lurking, insidious germs of disease in their midst, it would be but a short time before the registration reports of the State would cease to record this enormous mortality among the children.

The following table shows the percentage of mortality in the different counties of the State, from all causes, during the year 1882, of both sexes:—

| | Percentage. | | Percentage. |
|------------------------------|-------------|----------------------------|-------------|
| Addison . . { Males, 209 | 1.72 | Lamoille . . { Males, 98 | 1.53 |
| { Females, 202 | 1.68 | { Females, 100 | 1.59 |
| Bennington . . { Males, 179 | 1.62 | Orange . . . { Males, 193 | 1.62 |
| { Females, 188 | 1.73 | { Females, 241 | 2.07 |
| Caledonia . . . { Males, 185 | 1.55 | Orleans . . . { Males, 167 | 1.47 |
| { Females, 235 | 2.02 | { Females, 181 | 1.69 |
| Chittenden . . { Males, 239 | 1.48 | Rutland . . . { Males, 344 | 1.61 |
| { Females, 276 | 1.65 | { Females, 320 | 1.56 |
| Essex { Males, 60 | 1.44 | Washington, { Males, 221 | 1.76 |
| { Females, 62 | 1.65 | { Females, 228 | 1.78 |
| Franklin . . . { Males, 223 | 1.49 | Windham . . { Males, 251 | 1.88 |
| { Females, 226 | 1.48 | { Females, 203 | 1.51 |
| Grand Isle . . { Males, 22 | 1.06 | Windsor . . . { Males, 273 | 1.57 |
| { Females, 31 | 1.52 | { Females, 293 | 1.61 |

The percentage of the aggregate is, — males, 1.61; females, 1.70.

SEX. — The number of males reported was two thousand six hundred and ninety-three (2,693); of females, two thousand eight hundred and fifteen (2,815); with forty-nine "unknown." The excess of females is one hundred and twenty-two (122); last year, one hundred and twenty-six (126).

NATIVITY. — Four thousand eight hundred and ninety-eight (4,898) were of American parentage, and one thousand seven hundred and fourteen (1,714) were of foreign parentage, with one hundred and forty-nine (149) "unknown."

SEASON. — The order of months in fatality was as follows: September, 514; last year, March, 541; October, 508; April, 507; March, 492; August, 483; December, 471; May and July, each 458; November, 431; January, 418; February, 414; June, 386. In 1880 the order was, March, 541; April, 520; August, 511; October, 468; September, 457; May, 443; November, 438; December, 418; July, 391; June, 362; January, 356; February, 352.

CAUSES OF DEATH.

We have the record of no prevailing epidemic during the year 1881. There has been a slight increase in the decedents from Diphtheria, and a still larger increase of decedents from Scarlatina.

CLASSIFICATION OF DISEASES.

The diseases of the State are grouped into five classes, — *ZYMOTIC*, *CONSTITUTIONAL*, *LOCAL*, *DEVELOPMENTAL*, and *VIOLENT*.

In the class *Zymotic*, the number of decedents was one thousand one hundred and one (1,101), an increase from 1880 of one hundred and eight (108). In 1877 the number was one thousand one hundred and thirty-three (1,133). In 1878 it was nine hundred and eighty-three (983). In 1879 it was nine hundred and fifty-three (953). In 1880 it was nine hundred and ninety-six (996). For the five years, 1877–1881 inclusive, five thousand one hundred and sixty-six (5,166), an average of one thousand and thirty-three (1,033) per year. The percentages of all decedents for the same period were, in 1877, 23.40; in 1878, 20.07; in 1879, 18.49; in 1880, 18.93; in 1881, 19.81.

In the class *Constitutional*, the number of decedents was one thousand one hundred and fifty (1,150). In 1880 it was one thousand one hundred and seventy (1,170). In 1879 it was one thousand hundred and ninety (1,190). In 1878 it was one thousand seventy-eight (1,078). In 1877 it was one thousand one hundred and thirty-eight (1,138). For the five years, 1877–1881 incl

the number of decedents was five thousand seven hundred and twenty-six (5,726), an average of one thousand one hundred and forty-five (1,145) per annum. The percentages of all decedents for the same period were, in 1877, 23.40; in 1878, 21.71; in 1879, 23.04; in 1880, 20.34; in 1881, 20.69.

In the class *Local*, the number of decedents for 1881 was one thousand nine hundred and twenty-six (1,926). In 1877 it was one thousand five hundred and ninety-nine (1,599). In 1878 it was one thousand six hundred and forty (1,640). In 1879 it was one thousand seven hundred and fifty-six (1,756). In 1880 it was one thousand eight hundred and eighty-nine (1,889). For the five years, 1877-1881 inclusive, the aggregate was eight thousand and ninety-one (8,091), an average of one thousand seven hundred and sixty-two (1,762) per annum. The percentages of all decedents were as follows: in 1877, 32.70; in 1878, 33.49; in 1879, 34.00; in 1880, 22.64; in 1881, 32.68.

In the class *Developmental*, the number of decedents was five hundred and twenty-eight (528), a large decrease from 1879, when it was nine hundred and twenty-six (926). In 1877 it was eight hundred and seven (807). In 1878 it was eight hundred and fifty-five (855). In 1879 it was nine hundred and twenty-six (926). In 1880 it was nine hundred and twenty-five (925). For the five years, 1877-1881 inclusive, the number was four thousand and forty-one (4,041), an average of eight hundred and eight (808). The percentages for the same period were as follows: in 1877, 16.60; in 1878, 17.46; in 1879, 17.93; in 1880, 17.58; in 1881, 09.30.

In the class *Violent*, the number of decedents was two hundred and sixteen (216). In 1877 it was one hundred and seventy (170). In 1878 it was three hundred and forty (340). In 1879 it was one hundred and ninety-one (191). In 1880, one hundred and eighty-seven (187). For the five years, 1877-1881 inclusive, the number was one thousand one hundred and four (1,104), an average of two hundred and twenty (220) per annum. The percentages for the same period are as follows: in 1877, 0.35; in 1878, 6.94; in 1879, 3.71; in 1880, 3.55; in 1881, 0.38.

During the twenty-five years now covered by these Registration Reports, the whole number of decedents in the first class was twenty-nine thousand five hundred and twelve (29,512), an average of one thousand one hundred and eighty (1,180) per year; in the second class it was twenty-seven thousand and sixty-five (27,065), an average of one thousand and eighty-two (1,082) per annum; in the third class it was thirty-three thousand seven hundred and ninety-four

(33,794), an average of one thousand three hundred and fifty-one (1,351); in the fourth class it was fourteen thousand five hundred and three (14,503), an average per year of five hundred and eighty (580); in the fifth class the number was four thousand five hundred and thirty-eight (4,538), an average of one hundred and eighty-two (182) per year.

The following table presents the mortality, by months and at different ages, from twelve principal causes of death during the year, which also shows the period of the year in which the largest mortality takes place:—

| DISEASES. | Consumption. | Pneumonia. | Pneumonia Typhoides. | Old Age. | Heart Disease. | Dropsy. | Diphtheria. | Apoplexy. | Paralysis. | Cholera Infantum. | Typhoid Fever. | Cancer. |

In the above table, we group together the number of decedents in each of sixteen diseases that are prevalent in the State, in the order of their fatality, since the commencement of these Registration Reports in 1857. The first column comprises the number of decedents in each disease from 1857 to 1876 inclusive, the second, third, fourth, fifth, and six, the numbers for 1877, 1878, 1879, 1880, and 1881.

The whole number of decedents from the above causes during the twenty-five years of these Registration Reports is as follows: consumption, 19,505; pneumonia, 8,032; fevers, 7,095; old age, 7,418; diphtheria, 6,575; heart disease, 5,114; scarlatina, 3,683; infantile, 3,583; apoplexy, 2,730; dropsy, 2,675; dysentery, 2,478; cancer, 2,854; brain disease, 2,010; croup, 1,377; paralysis, 1,796; cholera infantum, 1,411. One fact is very apparent from these figures; namely, that lung diseases are by far the most prevalent in the State. It would be an interesting study to investigate the causes of this fact, — whether it be in the moist, foggy atmosphere of some localities in the State; or whether it be wholly the influence or the result of hereditary taint; or whether it be a germ or spore floating in the atmosphere, the product of some decomposition, or of some chemical disorganization; or whether it be neither. Investigations have been undertaken with the end in view, to discover the ultimate cause of consumption. Theories have been advanced, — plausible theories, that had the appearance of being sound and well based. Therapeutical indications have been advanced. Remedies based upon these views have been tested, and yet the number of decedents from lung diseases is not materially diminished. Variations in number occur from year to year, but the average is nearly eight hundred. In this State the population does not increase sufficiently from one decade to another to enable us to say that lung diseases are on the whole diminishing in any perceptible degree.

CAUSES OF DEATH IN DETAIL.

OLD AGE. — This fruitful source of reported mortality in the State occasioned the death of four hundred and twenty (420) between the ages of sixty and a hundred. Old Age can hardly be considered a disease: it is rather a general decay of the system, a wasting away of the vital powers, bringing the machinery of human life to its stopping-place. Six have passed away during the year who had survived a century. Peter Trainer of Lunenburg, Sept. 21, 105 years, 8 months, 15 days; Charles Stebbins of Rutland, 103 years; Isaac Farwell of Dorset, 101 years, 10 months, 10 days; Zeruiah Eaton of

Danville, 101 years, 3 months, 20 days; Jane Phœbe Goodwin of Newbury, 101 years, 1 month; Betsey Ross of Ferrisburg, 100 years. Of those who died, two hundred and five (205) were males, and two hundred and eleven (211) were females; 4 were "unknown." Three hundred and twenty-three were over eighty years of age, and 85 were over seventy. The mortality for the months varied from 28 in June to 43 in February, the large majority dying in the colder months of the year. In December, January, February, and March, the number of decedents was 153. In April, May, June, and July, it was 125. In August, September, October, and November, it was 139. The per cent of all decedents was 7.55, against 7.45 in 1880.

PARALYSIS. — The number of decedents from this cause during the year 1881 was two hundred and thirty-five (235), against one hundred and eighty-three (183) in 1880. Of these, ninety-three (93) were males, and one hundred and forty-one (141) were females; 1 "unknown." During the five years, 1877–1881 inclusive, the decedents from this cause have been as follows: in 1877, 190 (105 males, 85 females); in 1878, 200 (108 males, 92 females); in 1879, 185 (94 males, 91 females); in 1880, 183 (71 males, 112 females); in 1881, 234 (93 males, 141 females); total, 993 (471 males, and 521 females). Five are reported as under twenty years of age, and three of these as under five, — a circumstance not in accordance with the general rule in this disease. One hundred and fifty-one were over seventy, 37 between sixty and seventy, and 41 between twenty and sixty. The largest number of decedents was in April, 29; then, September, 26; October, 24; August, 23; June and November, each 20; February and March, each 17; December and January, each 16; May, 14; July, 13. The order of counties was, Rutland, 36; Windsor, 28; Addison, 26; Franklin, 20; Bennington and Chittenden, each 18; Windham, 17; Orleans, 16; Orange, 15; Caledonia and Lamoille, each 14; Washington, 9; Essex, 4; Grand Isle, none. The increasing prevalence of this disease in the State is more noticeable this year than ever before. The percentage of decedents from this cause for the five years, 1877–1881, is as follows: in 1877, 0.39; in 1878, 4.08; in 1879, 3.58; in 1880, 3.48; in 1881, 4.21.

HEART DISEASE. — The decedents from this cause during the year 1881 number three hundred and fifty-five (355), against three hundred and fourteen (314) in 1880. Of these, 189 were males, and 164 were females, with 2 "unknown." Thirty-four are reported as over eighty years of age, 99 as over seventy, 69 as over sixty, 44 as over fifty, 28 over forty, 19 over thirty, 20 over twenty, 19 between five and twenty, and 18 under five. By months the mortality was, October,

44; May, 42; April, 39; December, 35; July, 32; September and November, each 27; August, 26; June, 24; January, 22; February and March, each 18. By counties, the mortality was, Windsor, 57; Rutland, 38; Orange, 33; Washington, 30; Addison and Windham, each 27; Chittenden and Franklin, each 26; Caledonia, 20; Bennington and Lamoille, each 19; Orleans, 15; Essex, 7; Grand Isle, 4. During the five years, 1877-1881, the mortality from this disease has been as follows: in 1877, 255 (134 males, 121 females); in 1878, 262 (140 males, 122 females); in 1879, 302 (140 males, 162 females); in 1880, 314 (154 males, 160 females); in 1881, 355 (189 males, 164 females); total, 1,488 (757 males, 729 females); 2 "unknown." The percentages to all deaths during the same period were, in 1877, 0.56; in 1878, 5.65; in 1879, 5.69; in 1880, 6.44; in 1881, 6.38. It is an appalling fact, that the mortality from heart disease is increasing from year to year. It reaches the active business men and women of the State, and cuts them down in the midst of their usefulness.

PNEUMONIA. — The number of decedents from this cause during the year was four hundred and thirty-five (435), of which two hundred and twenty-four (224) were males, and two hundred and three (203) were females. This number is a considerable increase over last year, when it was three hundred and thirty-six (336). Of these, 74 were under five years of age, 43 were over eighty, 92 over seventy, 58 over sixty, 28 over fifty, 26 over forty; 63 were between ten and forty. The counties were represented as follows: Orange, 51; Washington and Windsor, each 44; Windham, 43; Addison, 41; Caledonia, 38; Rutland, 37; Orleans, 33; Franklin, 28; Bennington, 22; Chittenden, 21; Lamoille, 17; Essex, 13; Grand Isle, 3.

From the following table, it appears that the whole number of decedents from this disease during the twenty-five years, 1857-1881, was eight thousand one hundred and twelve (8,112); and, from the following table, it appears that more than half the number were fifty years of age and over, while only a small portion of them were under fifteen: —

The statistics of this disease by counties during the twenty-five years of this registration, the per cent of all decedents, and the number of each sex, are given in the following table:—

| Years. | Whole No. of Deaths. | Deaths from Pneumonia. | Per cent. | Males. | Females. | Addison. | Bennington. | Caledonia. | Chittenden. | Essex. | Franklin. | Grand Isle. | Lamoille. | Orange. | Orleans. | Rutland. | Washington. | Windham. | Windsor. |
|----------------|----------------------|------------------------|-----------|--------|----------|----------|-------------|------------|-------------|--------|-----------|-------------|-----------|---------|----------|----------|-------------|----------|----------|

Total No. of deaths, 117,387; average, 4,695.4. Deaths from Pneumonia, 8,112: males, 4,100; females, 3,957; average, 324.

The ages of decedents from this cause, during the years 1857-1881 inclusive, will be found in the following table:—

| YEARS. | Under 5. | 5 to 10. | 10 to 15. | 15 to 20. | 20 to 30. | 30 to 40. | 40 to 50. | 50 to 60. | 60 to 70. | 70 to 80. | Over 80. | Unknown. |
|------------|----------|----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|----------|----------|
| 1857 . . . | 69 | 5 | - | 3 | 6 | 5 | 6 | 12 | 20 | 23 | 12 | 1 |
| 1858 . . . | 67 | 6 | 5 | 8 | 10 | 7 | 18 | 21 | 21 | 32 | 13 | 1 |

| Totals . . | 2,026 | 185 | 138 | 213 | 391 | 340 | 483 | 727 | 1,134 | 1,469 | 798 | 78 |

Since Pneumonia represents one extreme of age, and Consumption finds the major part of its victims in middle age, it may be well to consider the two diseases together.

CONSUMPTION. — The decedents from Consumption in 1881 were eight hundred and twenty-one (821), of which three hundred and three (303) were males, and five hundred and eleven (511) were females, with 7 “unknown.” In 1880 the number was seven hundred and ninety-eight (798). Twenty-two were over eighty years of age, 84 were over seventy, 89 over sixty, 66 over fifty, 99 over forty, 119 over thirty, 225 were over twenty, 61 over fifteen, 18 between five and fifteen, and 31 under five. The mortality by months was July, 82; April, 79; March and May, 75 each; January, 74; November, October, 69; August, 64; June, 62; February, 57; December, 53;

September, 48. By counties the mortality was, Chittenden, 96; Rutland, 92; Windsor, 73; Franklin and Windham, 72 each; Washington, 70; Caledonia, 61; Orange, 60; Addison, 56; Bennington and Orleans, 55 each; Lamoille, 28; Essex, 17; Grand Isle, 11.

Of the males, 13 were over eighty years of age, 37 over seventy, 36 over sixty, 22 over fifty, 154 between twenty and forty, 21 under five, and 20 between five and fifteen. Of the females, 146 were between twenty and thirty, 88 between thirty and forty, 55 between forty and fifty, 100 between sixty and eighty, 9 over eighty, 48 between fifteen and twenty, and 11 between five and fifteen.

The following table gives the number of decedents from this disease during the twenty-five years, 1857-1881, the annual per cent, the sex, the number under forty years of age, and sex:—

No. 1.

| YEARS. | Number of Deaths. | Per cent. | Males. | Females. | Under 40 years of age. | Males. | Females. |
|------------|-------------------|-----------|--------|----------|------------------------|--------|----------|
| 1857 . . . | 785 | 24.11 | 259 | 526 | 432 | 122 | 310 |
| 1858 . . . | 738 | 21.18 | 261 | 477 | 410 | 123 | 287 |
| 1859 . . . | 734 | 19.37 | 264 | 470 | 423 | 142 | 281 |

| Living to 1 Death . . | 454 | 391.8 | 414 | 378 | |

From the above tables, it appears that lung diseases are the most prevalent of any diseases in the State; and that, as compared with diseases of other organs of the system, the mortality from them is the greatest. Other diseases vary in their mortality as they are epidemic or endemic; but these, Consumption and Pneumonia, carry off about the same number of victims year by year. The average of the one is about eight hundred, of the other about three hundred.

TYPHOID FEVER.—The number of decedents reported from this cause during the year was one hundred and twenty-four (124); last year, one hundred and thirty-six (136). Of these, 49 were males, and 70 were females, 5 “unknown.” Besides these, there were 51 decedents from “fever” reported, 22 males and 27 females, 2 “unknown;”

13 from *bilious fever*, of which 7 were males and 6 females; 3 from *congestive fever*, 1 male and 2 females; 5 from *malarial fever*, 4 males and 1 female. In the aggregate, it will do no violence to any rational nosological arrangement to place them together; for the only appreciable difference between them is in their local manifestations.

In the following table will be found the number of decedents from this disease in each county of the State, with the sex and total for each of the twenty-five years covered by these Registration Reports, 1857-1881:—

TYPHOID FEVER, No. 1.

| YEARS. | Addison. | Bennington. | Caledonia. | Chittenden. | Essex. | Franklin. | Grand Isle. | Lamoille. | Orange. | Orleans. | Rutland. | Washington. | Windham. | Windsor. | Males. | Females. | Total. | Unknown. |

| Totals, | 441 | 449 | 529 | 534 | 121 | 462 | 80 | 275 | 703 | 407 | 747 | 648 | 722 | 794 | 3,495 | 3,400 | 6,895 | 114 |

* Infantile fever is included.

In the preceding table, the equality of the sexes is noticeable, there being a difference of only 95 in the aggregate of twenty-five years. It will be noticed, also, that more than half the mortality from this disease was in the six southern counties of the State, the counties ranking as follows: Windsor, 794; Rutland, 747; Windham, 722; Orange, 703; Washington, 648; Chittenden, 534; Caledonia, 529; Franklin, 462; Bennington, 449; Addison, 441; Orleans, 407; Lamoille, 275; Essex, 121; Grand Isle, 80.

The following table shows the number of decedents from this disease at different ages during the same period:—

TYPHOID FEVER, No. 2.

| YEARS. | Under 5. | 5 to 10. | 10 to 15. | 15 to 20. | 20 to 30. | 30 to 40. | 40 to 50. | 50 to 60. | 60 to 70. | 70 to 80. | Over 80. | Unknown. |
|--------|----------|----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|----------|----------|
| 1857 | 19 | 7 | 8 | 30 | 39 | 12 | 16 | 14 | 12 | 14 | 3 | 1 |

| 1881 | 23 | 17 | 16 | 22 | 31 | 17 | 12 | 13 | 12 | 15 | 10 | 7 |
| Totals | 672 | 396 | 514 | 1,016 | 1,448 | 637 | 537 | 466 | 584 | 466 | 192 | 116 |

From the second of these tables, it appears that the greatest fatality from this disease was between the ages of twenty and thirty. The period between fifteen and twenty stands next, and these two periods comprise more than one-third of the whole number of decedents. Then follow those under five, then those between thirty and forty, then those between sixty and seventy, then between forty and fifty, then between ten and fifteen, then between fifty and sixty, then between seventy and eighty, then between five and ten, and, finally, those over eighty. No age is exempt from the fatality of this disease, indicating that there are other than hereditary causes for its presence and mortality. Hereditary diseases work out their termination with the greatest certainty in the middle ages of life, or in its approaching maturity. Pneumonia finds its most abundant harvest in infancy or in mature age; whilst typhoid fever, like the scythe of Time, cuts down all ages

from childhood to old age. It is miasmatic in its origin. Its germs are the result of decomposing filth. Ordinarily they can be traced to some neglected cesspool, to impure water, to a malarial swamp; and, when these are removed or purified, the mortality of the disease is at once arrested. No facts in medical science are better established than these. The disease is contagious and infectious, but proper sanitary and hygienic measures will destroy both the contagion and the infection. The large mortality from it is unnecessary. A majority of this large number of decedents might have been saved from the grasp of death. But the measures necessary to accomplish an object so desirable must be set in operation by legislation. The authority of law must back up the instructions of the physician. The best sanitary and hygienic regulations will be no better than ropes of sand if they are not enforced by proper legislation.

DIPHTHERIA.—The number of decedents from this cause during the year 1881 was two hundred and thirty-three (233), of which 110 were males, and 123 were females. This is a slight increase over 1880, when the number was 219; but it does not indicate an epidemic of this terrible disease. Of this number, 86 were under five years of age, 75 under ten, 45 under fifteen; 11 were between fifteen and twenty, 5 between twenty and thirty, 8 between thirty and forty, 1 between forty and fifty, and 1 between seventy and eighty. The mortality by months was as follows: October, 32; April, 26; September and December, each 25; March, 22; August and February, each 18; November, 17; July, 15; May and January, each 10; June, 9. By counties it was, Washington, 54; Rutland, 45; Windham, 20; Bennington, 19; Addison, 17; Franklin, 16; Caledonia, 15; Orleans, 12; Orange, 11; Windsor, 9; Chittenden, 8; Essex, 6; Lamoille, 2; Grand Isle, none. The counties of Washington and Rutland suffered most during the year 1881; while Bennington, Rutland, and Franklin were the counties most afflicted in 1880.

The following table shows the progress and mortality of this disease in each county of the State in each of the years in which it is recorded from 1858 to 1881 inclusive:—

| YEARS. | Addison. | Bennington. | Caledonia. | Chittenden. | Essex. | Franklin. | Grand Isle. | Lamoille. | Orange. | Orleans. | Rutland. | Washington. | Windham. | Windsor. |

* One hundred and ninety decedents are reported, but no detail of counties given.

† Seventy-three decedents, included with Scarlatina, in detail of counties given.

The whole number of decedents from Diphtheria during the twenty-three years in which records of mortality from it have been reported, is six thousand five hundred (6,500). The six southern counties of the State, containing more than half the population of the State by the last census (173,216), report the largest number of decedents from this cause, three thousand three hundred and ninety-five (3,395), against two thousand nine hundred and fifteen (2,915) in the eight remaining counties, whose population is 159,070. The counties of the State in which the epidemic marchings of this disease have been the most fatal during this period of years are, Windsor, Windham, and Caledonia; and these are also the counties which suffered most from its ravages in 1862, 1863, and 1864, when the mortality from Diphtheria exceeded that of Consumption.

SCARLATINA. — The number of decedents from this cause during the

year 1881 was one hundred and thirty-eight (138), an increase from 1880, when it was ninety-six (96). Of these, 68 were males, and 70 were females. Ninety-three were under five years of age, 30 were under ten, 10 were under fifteen, and the remaining 5 were under forty. The counties rank as follows: Rutland, 45; Bennington, 17; Orange, 16; Addison, 13; Franklin, 12; Washington, 10; Windsor, 7; Orleans and Windham, each 4; Caledonia, Essex, Lamoille, each 3; Chittenden, 2; Grand Isle, none.

The following table gives the number of decedents from this disease in each county of the State during the twenty-five years covered by these Registration Reports:—

| YEARS. | No. each year | Addison. | Bennington. | Caledonia. | Chittenden. | Essex. | Franklin. | Grand Isle. | Lamoille. | Orange. | Orleans. | Rutland. | Washington. | Windham. | Windsor. |

Three points are noticeable in the foregoing table: The gradual increase of decedents from Scarlatina from 1863 (when the epidemic of

Diphtheria had reached its height, and was diminishing in its mortality) to 1872 (when the largest number of decedents from it were reported); its gradual subsidence from that time to 1876, when Diphtheria began to be more prevalent; and now again, in 1881, the number of its decedents is increasing somewhat, but in different portions of the State from those where Diphtheria prevails. The two are not co-existent in the same locality. The other point is, that the greatest mortality from this disease occurs in the centres of population. In the more rural districts or less populous localities, the mortality is comparatively small.

BRIGHT'S DISEASE. — The decedents from this disease are becoming more numerous. During the year 1881, the number was fifty-nine (59), of which 33 were males, and 25 were females; 1 "unknown." In 1880 the number was 54, and, from other kidney diseases, 52; in 1879, 38, and from other diseases of the same organs, 38; in 1878, 32 and 31; in 1877, 25 and 37. The decedents from other kidney diseases in 1881 were 63, of which 50 were males and 12 females; 1 "unknown." Of those dying from Bright's Disease, 3 were over eighty, 9 between seventy and eighty, 13 between sixty and seventy, 7 were over fifty, 5 were over forty, 9 over thirty, 7 over fifteen, 3 under five, and 2 between five and ten. Of those dying from "Kidney disease," 49 were over sixty, and the majority of them over seventy, 2 were under five, and 10 between five and fifty. The majority of them died in the warmer months of the year, whilst those dying from Bright's Disease are scattered quite equally through all the months of the year.

DIABETES. — This is a disease closely akin to Bright's Disease, and is increasing in the number of its decedents. In 1877 the number was 16 (10 males and 6 females), in 1878 it was 26 (20 males and 6 females), in 1879 it was 19 (12 males and 7 females), in 1880 it was 33 (24 males and 9 females), in 1881 it was 21 (17 males and 4 females). The causes which contribute to this increase of diseases of the kidneys, special and general, are matters of interest, both to the profession and to the people.

DYSENTERY. — The number of decedents from this cause for the year 1881 was 66, of which 26 were males and 38 were females; 2 unknown. Of these, one-half were under five, and 25 over fifty. All save eight died in the months of July, August, September, and October. For the five years, 1877-1881, the mortality has been as follows: In 1877, 97 decedents are reported (52 males and 45 females); in 1878, 61 (28 males, 33 females); in 1879, 44 (23 males and 21 females); in 1880, 61 (of which 26 were males and 35 were females); in 1881, 66 (26 males, 38 females; 2 "unknown").

CHOLERA INFANTUM. — The number of decedents from this infantile disease in 1881 was 171, of which 99 were males, and 72 were females. All save 4 were under five, 2 were under ten, and 1 under twenty. All save 15 died in the months of July, August, September, and October, — a majority of them in the months of August and September. For the five years, 1877–1881, the decedents have been as follows: in 1877, 154 (78 males, 76 females), all save 3 under five years of age; in 1878 the number was 105 (55 males and 50 females), all under five; in 1879, 113 (of which 63 were males, and 50 were females), all save 1 under five years of age; in 1880, 157 (of which 79 were males, and 77 were females; 1 “unknown”), all under five; in 1881, 171 (99 males and 72 females).

CANCER. — The number of decedents reported from this cause during the year 1881 was 147, of which 50 were males, and 96 were females, 1 unknown. Two are reported as under five, 29 were between forty and fifty, 25 between fifty and sixty, 40 were between sixty and seventy, 22 were between seventy and eighty, and 17 over eighty. One hundred and twelve are reported simply as *Cancer*, of whom 35 were males, and 76 were females; 1 as *Cancer of the Bowels*, 5 as *Cancer of the Breast*, 5 as *Cancer of the Liver*, 21 as *Cancer of the Stomach*, 1 *Cancer of Tongue*, and 2 *Cancer of Womb*. The greatest mortality was in July, 19; then, October, 16; December, 15; September, 14; April and May, each 13; January, 11; February, June, August, each 10; March and November, each 8. The order of counties was, Windsor, 25; Rutland, 19; Orange, 14; Washington, 15; Lamoille, Chittenden, Windham, each 12; Bennington, Caledonia, Orleans, each 9; Addison, Franklin, each 7; Essex, 2; Grand Isle, 1. During the five years, 1877–1881, the decedents from Cancer have been as follows: in 1877, 158 (62 males, 96 females), among which 25 were of the *Stomach*, 2 of the *Throat*, 5 of the *Liver*, 6 of the *Face*, 1 of the *Eye*, 7 of the *Breast*, 1 of the *Bowels*, and 2 of the *Womb*. In 1878 the number was 177 (65 males, 112 females), among which 6 were of the *Breast*, 1 each of the *Eye*, *Face*, *Head*, *Bowels*, *Back*, and *Prostate*, 4 of the *Liver*, 25 of the *Stomach*, and 3 of the *Womb*. In 1879, 155 (66 males, 89 females), among which were 2 each of the *Bladder* and *Rectum*, 1 each of *Face* and *Lip*, 3 each of *Bowels* and *Face*, 4 of *Breast*, 9 of *Liver*, and 33 of *Stomach*. In 1880, 177 (68 males, 109 females), among which were 1 each of *Bladder*, *Finger*, *Kidneys*, *Jaw*, and *Tongue*, 2 each of *Face* and *Lip*, 3 each of *Breast* and *Rectum*, 4 of *Liver*, 5 of *Bowels*, and 8 of *Womb*.

BRAIN DISEASES. — Under this head are included all diseases of the brain not special to infancy. The number of decedents recorded from

Brain Disease simply, during the year 1881, was 90, of whom 49 were males, and 41 females. All ages are reported, from under five to over eighty. Deaths occurred in all the months of the year, from 12 in April to 3 in December. As *Softening of the Brain*, we find 23 decedents reported (13 males, 10 females), all of them save 3 over fifty years of age; 3 are reported as between forty and fifty. As *Congestion of the Brain*, 18 cases are reported (13 males and 5 females), 8 of which were under five years of age, and none over sixty. *Apoplexy* was the cause of 91 deaths, 48 males and 42 females, 1 unknown. Of these, 17 were over eighty, 24 over seventy, 18 over sixty, 13 over fifty, 10 over forty, 6 over thirty, and 2 over twenty. The months were about equally represented. The greatest mortality occurred in Windsor County, 15; the least, in Essex, 2. The whole number of these decedents is 222, a slight increase from last year. Of these, 123 were males and 98 females; 1 "unknown."

Under the class of diseases affecting the brain or its meninges, or referable to it, we find *Epilepsy* credited with 11 decedents, of which 2 were over eighty years of age, 2 over seventy, 2 over sixty, 1 over fifty; 8 were males, and 3 were females. *Hydrocephalus* is credited with 14 decedents, in sex equally divided. *Insanity*, 8, sexes equal. *Meningitis*, 7, 4 males, 3 females. *Cerebro Spinal Meningitis*, 40, sexes equal; all under fifty years of age, the majority under fifteen; total, 80.

Among the singularities of registration in 1881, the town of Waltham reports, "no returns to be made." The towns of Glastenbury, Landgrove, Stannard, St. George, Victory, Ira, report no marriages. The town of Baltimore reports no marriages and no births, 1 death from "old age."

TWENTY-SIXTH REPORT
TO THE
LEGISLATURE OF VERMONT,
RELATING TO THE
REGISTRY AND RETURNS
OF
BIRTHS, MARRIAGES, AND DEATHS
IN THE STATE
FOR THE YEAR ENDING DECEMBER 31, A.D. 1882.

PREPARED BY GEORGE NICHOLS,
SECRETARY OF STATE.

BOSTON:
PRINTED BY RAND, AVERY, & COMPANY.
1884.

13988.

REPORT.

STATE OF VERMONT.

OFFICE OF SECRETARY OF STATE,
NORTHFIELD, Aug. 1, 1884.

TO THE GENERAL ASSEMBLY.

In compliance with the laws of the State relating to the Registry and Returns of Births, Marriages, and Deaths, I have the honor to transmit herewith the Twenty-sixth Annual Report relating thereto.

Respectfully submitted.

GEORGE NICHOLS,
Secretary of State.

CONTENTS.

TABLES.

| | PAGE |
|--|-------|
| I. GENERAL ABSTRACT. — Population in 1880, Births, Marriages, and Deaths, registered in each town, in 1882, distinguishing the sex and parentage of Births; the nativity of Marriages; the sex, aggregate and average ages; and the percentage of deaths | 2-17 |
| <i>Recapitulation.</i> — Births, Marriages, and Deaths by counties | 18-19 |
| II. BIRTHS. — Showing the number of each sex in the several counties during each month, with percentage | 20-21 |
| <i>A. Supplement.</i> — Plural Births by counties, by months, and by sex | 22 |
| <i>B. Supplement.</i> — Illegitimate Births by counties, by months, and by sex | 23 |
| III. MARRIAGES. — By counties and by months | 24 |
| IV. PERSONS MARRIED. — By ages and by conjugal conditions, | 25-27 |
| V. DEATHS. — By counties, by months, by sex, and parentage | 28-29 |
| VI. DEATHS ACCORDING TO AGE. — Showing the number of each sex at different ages in each town and county, with the population and percentage | 30-75 |
| <i>Recapitulation.</i> — Of Deaths, according to age and sex, with percentage | 76-77 |
| VII. CAUSES OF DEATH. — Alphabetically arranged, showing the number of each sex dying at different ages during the several months, with the various diseases | 78-86 |
| VIII. CLASSIFICATION OF THE CAUSES OF DEATH. — By counties, with the totals and percentage | 88-95 |
| IX. OCCUPATION. — Showing the number of those pursuing different avocations, the number of deaths in each, the ratio to the living, and the aggregate and average ages of those dying | 96-98 |

| | |
|--|------|
| X. DIVORCES. — Exhibiting the number granted in each county, with the causes therefor; also, the ratio of divorces to marriages | 74 |
| XI. DIVORCES. — Exhibiting the number granted in each county, arranged with special reference to the libellants, 100- | 100- |
| RESULTS AND OBSERVATIONS | |
| General Summary | |
| BIRTHS | |
| Sex, with ratio thereof | |
| Births to population, by counties, and number in each county | |
| Number of births for each quarter | |
| Plural births | |
| Illegitimate births | |
| Stillborn | |
| Parentage, by counties | |
| MARRIAGES | |
| Nativity of those married | |
| Social condition of those married | |
| DIVORCES | |
| DEATHS | |

RESULTS AND OBSERVATIONS.

1882.

GENERAL SUMMARY.

DURING the year ending Dec. 31, 1882, the whole number of births recorded in the State was six thousand three hundred and thirty-one (6,331), of which three thousand two hundred and thirty-nine (3,239) were males, and three thousand and seventy-eight (3,078) were females. Of 14 the sex is not stated. Compared with 1881, the number of births was four hundred and thirty (430) less, and with 1880 they were three hundred and one (301) less. The difference in the proportion of the sexes was one hundred and sixty-one (161): in 1881 it was two hundred and twenty-four (224).

During the same period, two thousand eight hundred and eighty-three (2,883) couples were married, a number greater by one hundred and twenty (120) couples than in 1881, when it was two thousand seven hundred and sixty-three (2,763).

The number of decedents for the same period was five thousand four hundred and eighty-one (5,481), of which two thousand six hundred and seventy-one (2,671) were males, and two thousand seven hundred and sixty-one (2,761) were females. Of 49 the sex is not stated. Compared with 1881, the number of decedents was seventy-six (76) less, and with 1880 two hundred and twenty-one (221) greater.

The population of the State by the census of 1880 was 332,286. There was, therefore, during the year, one birth to every 52.5 of the population, against one to every 49.1 in 1881, and one to every 50 in 1880. One person to every 57.6 was married during the year. There was one decedent to every 60.6 of the population, against one to every 59 in 1881, and one to 63.1 in 1880.

The following table groups together the main facts in the registration of births, marriages, and deaths during the twenty-six years covered by these reports. They are given in quinquennial periods, save the last:—

| YEARS. | Whole Number of Births. | Stillborn. | Living Births. | Marriages. | Deaths. |
|---------------|-------------------------|------------|----------------|------------|---------|
| 1857-1861 . . | 32,682 | 645 | 32,037 | 11,391 | 18,753 |
| 1862-1866 . . | 27,512 | 383 | 27,129 | 11,343 | 24,538 |
| 1867-1871 . . | 36,260 | 828 | 35,432 | 14,109 | 22,313 |

| 1882 | 6,331 | 223 | 6,108 | 2,883 | 5,481 |
| Totals . . | 173,317 | 4,248 | 169,069 | 66,847 | 122,868 |
| Average . . | 6,666 | 163 3 | 6,503 | 2,571 | 4,725 |

BIRTHS.

In the following table we group together the whole number of births registered in the State during the twenty-six years, 1857-1882 inclusive, together with the average birth-rate for five quinquennial periods, the annual for one year, population to one birth, and number of each sex for the same periods:—

| YEARS. | Whole Number. | Average Birth-rate. | Population to 1 Birth. | Males. | Females. | Unknown. |
|-------------|---------------|---------------------|------------------------|--------|----------|----------|
| 1857-1861 . | 32,682 | 2.06 | 48 4 | 16,506 | 15,724 | 452 |
| 1862-1866 . | 27,512 | 1.77 | 56 6 | 14,126 | 13,215 | 171 |
| 1867-1871 . | 36,260 | 2.05 | 45 6 | 18,710 | 17,110 | 440 |
| 1872-1876 . | 35,950 | 2.16 | 45 9 | 18,417 | 17,480 | 53 |
| 1877-1881 . | 34,582 | 2.10 | 48. | 17,036 | 16,251 | 91 |
| 1882 . . . | 6,331 | 1.95 | 52 4 | 3,239 | 3,078 | 14 |
| Totals . . | 173,317 | — | — | 88,034 | 82,858 | 1,221 |
| Average . . | 6,666 | — | — | 3,386 | 3,264 | — |

From the above table it appears that the whole number of births in the State during the twenty-six years covered by these registration reports is one hundred and seventy-three thousand three hundred and seventeen (173,317), which exceeds the whole number of decedents in the same period by fifty thousand four hundred and forty-nine (50,449). Still-births excluded, these figures would indicate an increase of the population of the State amounting to forty-six thousand two hundred and one (46,201) in this period; but such is not the fact. Emigration has depleted more rapidly than the natural increase of population has supplied the deficiency, as shown by the figures of the census.

SEX. — Of the whole number of births in the State during the year, three thousand two hundred and thirty-nine (3,239) were males, and three thousand and seventy-eight (3,078) were females, or in the proportion of 105.2 males to each one hundred females, or 55.2 males to 44.8 females.

The counties were prolific in proportion to population as follows : —

| Population. | Counties. | Births. |
|-------------|----------------|--|
| 84,124 | Grand Isle . . | 117, or 1 birth to every 35.2 of the population. |
| 32,792 | Chittenden . . | 755, " " 43.4 " " |
| 41,829 | Rutland . . . | 900, " " 46.4 " " |
| 22,083 | Orleans . . . | 462, " " 48.4 " " |
| 30,225 | Franklin . . . | 616, " " 99.5 " " |
| 23,697 | Caledonia . . | 470, " " 50.2 " " |
| 12,684 | Lamoille . . . | 244, " " 52. " " |
| 24,173 | Addison . . . | 461, " " 52.4 " " |
| 21,950 | Bennington . . | 410, " " 53.5 " " |
| 25,404 | Washington . . | 431, " " 58.9 " " |
| 35,196 | Windsor . . . | 572, " " 61.5 " " |
| 26,763 | Windham . . . | 435, " " 61.6 " " |
| 7,931 | Essex | 125, " " 65. " " |
| 23,525 | Orange | 333, " " 70.6 " " |

The greatest number of births in one month was, March, 576; last year, September, 625. Next in order are, September, 572; June, 572; August, 566; April, 559; July, 557; May, 548; November, 537; October, 498; December, 477; January, 432; February, 430. The number for the third quarter is the largest, 1,695; then follows the second, 1,679; the fourth, 1,512; the first, 1,438. The births in the last half of the year exceed the first by 90; last year, by 299. The order of counties was, Rutland, 900; Chittenden, 755; Franklin, 616; Windsor, 572; Caledonia, 470; Orleans, 462; Addison, 461; Windham, 435; Washington, 431; Bennington, 410; Orange, 333; Lamoille, 244; Essex, 125; Grand Isle, 117.

The following table shows the number for each quarter from 1857 to 1882 inclusive, the aggregate of the five quinquennial periods being given : —

| YEARS. | First Quarter. | Second Quarter. | Third Quarter. | Fourth Quarter. | Totals. |
|-------------------|----------------|-----------------|----------------|-----------------|---------|
| 1857-1861 | 7,133 | 7,918 | 8,571 | 8,579 | 32,201 |
| 1862-1866 | 6,449 | 6,684 | 7,346 | 6,788 | 27,277 |
| 1867-1871 | 7,938 | 9,140 | 9,571 | 9,337 | 35,986 |
| 1872-1876 | 8,146 | 9,100 | 9,748 | 8,920 | 35,914 |
| 1877-1881 | 7,827 | 8,683 | 9,076 | 9,100 | 34,565 |
| 1882 | 1,438 | 1,679 | 1,695 | 1,512 | 6,323 |
| Totals | 38,931 | 43,204 | 46,007 | 44,236 | 172,266 |

The preponderance of births in the last six months of the year is eight thousand one hundred and eight (8,108).

PLURAL BIRTHS. — The number of plural births reported for 1882 is one hundred and twenty-eight (128), against one hundred and thirty-six (136) in 1881. Of these, 78 were males, and 48 were females, with 2 reported as unknown, or one to 49.5 of all births. Three of these cases were triplets, — one each in Chittenden, Orleans, and Washington Counties. The largest number of these births was, Rutland County, 20; then, Windham, 18; Windsor, 16; Franklin, 14; Washington, 12; Caledonia, Chittenden, and Orleans, each 10; Orange, 8; Addison, 6; Essex, Grand Isle, Lamoille, each 2; Bennington, none.

During the twenty-six years covered by these Registration Reports, the number of these births has been 3,083, of which 1,523 were males, and 1,370 were females.

ILLEGITIMATES. — Seventy-six (76) illegitimates are recorded in 1882, against forty-nine (49) in 1881. Three were twin cases. Thirty-four were males, and 40 were females; 2, sex unknown. Every county in the State is represented, Franklin County taking the lead with 11, Rutland with 10, Chittenden with 9, Caledonia and Windsor with 8, and the other counties varying from 2 to 6 each.

The number of these births, and their proportion to all births, are shown in the following table: —

| YEARS. | 1857-61. | 1862-66. | 1867-71. | 1872-76. | 1876-81. | 1882. | Totals. |
|-----------------------------|----------|----------|----------|----------|----------|-------|---------|
| Number . . | 219 | 207 | 271 | 302 | 326 | 76* | 1,401 |
| Males . . . | 100 | 89 | 149 | 162 | 175 | 34 | 709 |
| Females . . | 117 | 111 | 122 | 136 | 149 | 40 | 675 |
| Number to all
births . . | 147.0 | 131.7 | 154.0 | 115.6 | 109.8 | 83.3 | |

Of fourteen the sex is not stated.

The increase of illegitimate births is a sad commentary on the morality of the State.

STILLBORN. — The number for 1882 was two hundred and twenty-three (223). In 1881 it was two hundred and forty-two (242). Of these, 125 were males, and 98 were females. The ratio for the year was one to every 28.8 of all births. In 1881 it was one in 27.9, and, in

* Two sex not stated.

1880, one in 37.4. It might form a legitimate subject of inquiry, — the cause of this large number of “stillborn:” it might not be readily ascertained, but the reply would be likely to develop some violations of the laws of nature or of man which would not be the most pleasant subject of contemplation. It can hardly be possible that all these 223 cases reported as “stillborn” were the result of natural causes; and it is not very flattering to Puritan morality to suppose that any proportion of them was the result of direct interference with the natural laws of reproduction, either by self-infliction or by the hand of others.

PARENTAGE. — Four thousand six hundred and forty (4,640) births are recorded as American, and one thousand five hundred and twenty-seven (1,527) as foreign, with one hundred and sixty-four (164) as unknown. The largest number of those recorded as foreign were in Rutland County, 293; the next, in Chittenden County, 263. These counties are large manufacturing centres, and have a large proportion of the foreign population of the State in their borders. Franklin County ranks next, 181; then, Orleans, 147; Caledonia, 135; Bennington, 118; Addison, 79; Windham, 59; Windsor, 58; Washington, 57; Essex, 39; Orange, 38; Grand Isle, 33; Lamoille, 27.

The native population of the State, according to the census of 1880, was 291,327, and, of the foreign population, 40,959. The number of births, therefore, according to the population, was, American, one in 62.7, and of the foreign, one in 26.8.

MARRIAGES.

The whole number of marriages recorded during the year 1882 was two thousand eight hundred and eighty-three (2,883) couples, against two thousand seven hundred and sixty-three (2,763) in 1881. Of the persons married, four thousand eight hundred and twenty (4,820) were of American parentage, and eight hundred and seventy-nine (879) were of foreign parentage. A mixing-up of nationalities is apparent; but to what extent the statistics at hand do not show, further than that about four-fifths of the persons married were of American parentage, and that only about one-fifth were of foreign parentage; or that 2,410 marriages were American, and 473 foreign and unknown, parentage. Orleans, Franklin, and Chittenden Counties take the lead in marriages among the foreign population, and Windsor, Washington, Windham, and Franklin take the lead in those among the American population.

Of the marriages recorded during the year, two thousand two hundred and six (2,206) were the first marriage of both parties; 139

bachelors married widows; 312 widowers married maids; and 223 were the subsequent marriage of both parties. Of the first marriage of both parties, all save 6 were under forty-five years of age. One thousand one hundred and twenty men between twenty and thirty years of age married 513 maids under twenty, 504 under twenty-five, 91 under thirty, and 8 under thirty-five. Of 700 men between thirty and thirty-five, only two married maids above that age. In general the first marriages were with maids who were younger in years than the men. Of the first of men, and subsequent of women, 1 man between sixty-five and seventy married a widow thirty to thirty-five; 2 men between twenty and twenty-five married widows between forty-five and fifty; 24 between twenty-five and thirty married widows older than themselves; 8 between thirty and thirty-five married widows over thirty-five. The majority of these marriages, however, were with maids who were quite near the age or younger than the bridegrooms. Of the subsequent of men, but first of women, 1 between twenty and thirty married a maid older than himself; 2 between twenty-five and thirty married maids over thirty; 1 between thirty and thirty-five married a maid forty to forty-five; but these were the exceptions to the general rule. In the subsequent marriage of both parties, we find a general disposition to seek partners of corresponding age. In only five instances of the 221 was this rule transgressed. The largest number of marriages occurred in the months of November, 382; October, 303; December, 280. Beginning with October and ending with March inclusive, the number of marriages was 1,525, more than half the whole number for the year. The least number for any month was in July, 167.

DIVORCES.

During the year 1882, 162 divorces were granted by the courts of the State, a decrease of 6 from 1881. The ratio of divorces to marriages in 1881 was one to every 16; in 1882 it was one to every 17.8. Of the causes of divorce, *twenty-one* only were for "adultery," *thirteen* were for "desertion," *forty-eight* for "intolerable severity," *seven* were for "refusal to support," *fifty-nine* for "wilful desertion;" and the remainder were granted for a combination of these several "causes." In 52 of these cases the husband was the "libellant," and in 110 it was the wife. The counties rank as follows: Orange County, one in 10.2 marriages; Rutland, one in 12.2; Washington, one in 13.6; Grand Isle, one in 15.5; Windsor, one in 15.6; Addison, one in 15.8; Lamoille, one in 16.1; Windham, one in 17.1; Caledonia, one in 19.7; Chittenden, one in 24.1; Orleans, one in 24.5; Franklin, one in 26.9; Bennington, one in 27.9. Essex *reports no divorces.*

We are pleased to observe that public attention has been directed to the frequency of divorces in the State, and that the moral and Christian sentiment of the people is waking up to the subject. The attempt, in the Legislature of 1882, to increase the number of "causes of divorce" most signally failed, showing that the public conscience is aroused to the necessity of stopping the avalanche of divorce cases that is constantly pouring in upon our courts. But the object is not yet accomplished. Divorces are obtained too easily. More rigid scrutiny of testimony needs to be exercised.

DEATHS.

The whole number of decedents reported in 1882 was five thousand four hundred and eighty-one (5,481), against five thousand five hundred and fifty-seven (5,557) in 1881, a slight decrease. The number per quarter was one thousand three hundred and seventy (1,370); per month was four hundred and sixty-six and six-tenths (466.6); per week, one hundred and five and four-tenths (105.4); per day, a fraction over twelve.

The death-rate for the year was 1.65, against 1.67 for 1881.

AGES. — The average age of all the decedents in 1882 was 41.55, against 39.49 in 1881. Thus, while the number of decedents slightly decreased during the year, the average age of the decedents increased. The greatest average age by counties was in Orange, 52.56; last year, Windsor, 48.07. Then follow, Windham, 49.72; Windsor, 47.63; Lamoille, 44.38; Addison, 42.14; Washington, 41.33; Orleans, 39.83; Essex, 39.79; Bennington, 39.28; Franklin, 38.18; Caledonia, 37.94; Grand Isle, 36.75; Rutland, 36.66; Chittenden, 36.48.

The decedents under one year of age were nine hundred and eighteen (918); in 1881, nine hundred and eighty-four (984). Deducting 223, the number of "stillborn" during the year, the decedents from disease under one year of age were six hundred and ninety-five (695), or one-eighth of the entire mortality of the State. The decedents from one to two years of age was 216; from two to three, 108; from three to four, 89; from four to five, 79; from five to ten, 183; from ten to fifteen, 137. The whole number of decedents between one and five years of age was one thousand four hundred and ten (1,410): in 1881 it was one thousand four hundred and fifty-four (1,454). The decedents under five comprise one-fifth of the mortality of the State.

SEX. — The number of males reported in 1882 was two thousand six hundred and seventy-one (2,671), and of females, two thousand seven hundred and sixty-one (2,761). The excess of females was only 90, against 122 in 1881. Forty-nine are reported as "unknown."

NATIVITY.—Four thousand seven hundred and sixty-five (4,765) are reported as of American parentage, four hundred and eighty-seven (487) of foreign parentage, and one hundred and eighty-nine (189) as unknown.

SEASON.—The order of months in fatality was as follows: March, 539; September, 537; April, 507; August, 488; October, 473; May, 461; June, 450; December, 443; November, 410; January, 389; February, 386; July, 368. The first six months of the year the number of decedents was 2,732, the last six it was 2,709.

CAUSES OF DEATH.

No epidemic has prevailed during the year 1882. In the class *Zymotic*, nine hundred and thirty-one (931) decedents are recorded, which is less by one hundred and seventy (170) than in 1881. The percentage of decedents in this class is 17.0, against 19.81 in 1881.

In the class *Constitutional*, the number of decedents was one thousand one hundred and four (1,104) in 1882, against one thousand one hundred and fifty (1,150) in 1881. The percentage of decedents from this disease in 1882 was 20.34, against 20.69 in 1881.

In the class *Local*, the number of decedents was two thousand and sixty-five (2,065), an increase of 139 over 1881. The percentage of decedents in this class was 37.63, against 32.68 in 1881.

In the class *Developmental*, the number of decedents was eight hundred and twenty-one (821), an increase of 293 from 1881. The percentage was 14.97, against 09.30.

In the class *Violent*, the number of decedents was 186, a decrease of 30 from 1881. The percentage of decedents in this class was 0.34, against 0.35 in 1881.

The following table presents the fatality by months and at different ages from 12 principal causes of death during the year, which also shows the period of the year in which the largest mortality takes place:—

| DISEASES. | Consumption. | Pneumonia. | Scarlatina. | Old Age. | Heart Disease. | Bright's Disease. | Dropsy. | Diphtheria. | Apoplexy. | Paralysis. | Cholera Infantum. | Typhoid Fever. |
|-----------|--------------|------------|-------------|----------|----------------|-------------------|---------|-------------|-----------|------------|-------------------|----------------|

| own . . . | 5 | - | - | 7 | 2 | - | 1 | 1 | - | - | 1 | - |

This table also shows the ages at which there is the greatest mortality. Cholera Infantum, Diphtheria, and Scarlatina snap the cords of infant and childhood life; Consumption and Typhoid Fever prove fatal to youth and early manhood; Pneumonia, Heart Disease, Apoplexy, Paralysis, take their victims from riper age and growing manhood, leaving Old Age to pick up the few stragglers that linger on. Death, with his keen-edged scythe, cuts a broad swath in every pathway of life. He is no respecter of persons, of circumstances, of soundings, wealth, affection, or friends. The tall and reverend patriarch, the kingly-crowned, finds a level with the lowest in the scale of humanity.

In the following table we group together the number of decedents in each of 16 diseases that are prevalent in the State, in the order of their fatality, since the commencement of these Registration Reports in 1857. The first column comprises the number of decedents in each disease, from 1857 to 1876 inclusive; the second, the numbers for 1877, 1878, 1879, 1880, and 1881; and the third, the numbers for 1882:—

| 1857-1876 inclusive. | 1877-1881 inclusive. | 1882. |
|------------------------------------|------------------------------------|-----------------------------------|
| Whole Number of Decedents, 91,518. | Whole Number of Decedents, 25,869. | Whole Number of Decedents, 5,481. |
| Consumption . . . 15,522 | Consumption . . . 3,983 | Consumption . . . 786 |
| Pneumonia . . . 6,364 | Diphtheria . . . 1,605 | Pneumonia . . . 434 |
| Fevers . . . 6,139 | Old Age . . . 1,868 | Old Age . . . 402 |
| Old Age . . . 5,550 | Pneumonia . . . 1,668 | Heart Disease . . . 357 |
| Diphtheria . . . 4,970 | Heart Disease . . . 1,492 | Paralysis . . . 250 |
| Heart Disease . . . 3,622 | Cancer . . . 809 | Diphtheria . . . 204 |
| Scarlatina . . . 3,296 | Paralysis . . . 993 | Fevers . . . 201 |
| Infantile . . . 2,789 | Infantile . . . 854 | Cancer . . . 175 |
| Apoplexy . . . 2,286 | Fevers . . . 956 | Brain Disease . . . 147 |
| Dropsy . . . 2,154 | Cholera Infantum, 700 | Cholera Infantum, 132 |
| Dysentery . . . 2,154 | Dropsy . . . 521 | Dropsy . . . 105 |
| Cancer . . . 2,045 | Apoplexy . . . 444 | Bright's Disease . . . 86 |
| Brain Disease . . . 1,647 | Dysentery . . . 324 | Apoplexy . . . 84 |
| Croup . . . 1,081 | Croup . . . 296 | Scarlatina . . . 82 |
| Paralysis . . . 803 | Brain Disease . . . 363 | Croup . . . 63 |
| Cholera Infantum, 711 | Scarlatina . . . 387 | Dysentery . . . 58 |

The diseases mentioned in the foregoing table are those of most common occurrence in the State. Indeed, they form the bulk of the mortality in the State. Under the head of "Fevers" are included all the various forms of that disease,— "Typhoid," "Gastric," "Bilious," "Intermittent," etc.; all exhibiting the same general characteristics.

CAUSES OF DEATH IN DETAIL.

OLD AGE.—Four hundred and two decedents from this cause are reported for 1882. One will be noticed as dying of old age between thirty and forty years of age, a remarkable instance of rapid maturity in years, or a mistake of the "clerk" who reported the case. Four are reported as having survived the century,—Orvia Scott (colored), Pownal, one hundred and seven years, three months; Ann (Leonard) Plaisted, Royalton, one hundred years; Madam Francis, Milton, one hundred and ten years; Mary (Price) Stewart, Bennington, one hun-

dred and nine years. Of the number reported, 193 were males, and 209 were females. Three hundred and seventeen were over eighty years of age, many of them over ninety, and 73 were over seventy. The mortality for the months was 25 in July, to 44 in December, all the months being represented with remarkable uniformity throughout. During the three winter months, 114 deaths occurred; during the spring months, 104; during the summer months, 81; and during the fall months, 101. The percentage of all decedents was 0.75. As a remarkable instance of longevity in one of the smaller and back towns of the State, take the following:—

The population of the town of Reading, Vt., is 953. There were 18 deaths last year, of which number, 7 were of persons between eighty and eighty-seven years of age, 3 persons between seventy-two and seventy-seven years of age, and 1 a person sixty-nine years of age, leaving but seven persons who died at ages less than about three-score and ten years; in other words, almost two-thirds of those dying were seventy years of age. Since this year opened, three ladies, each nearly ninety years of age, have died. There are now living here of very aged people, Mr. Samuel Bailey, aged ninety years, a mechanic and a temperate man; Leicester Emerson, aged eighty-eight years, a farmer, also temperate; Charles Buck, aged over eighty years, still carries on his farm, and is a man of temperate habits; Hannah Sawyer, over eighty years old; Mariel Sherwin, eighty-seven; and quite a number of persons born and living here who are eighty years old, or quite near that figure.

PARALYSIS.—The number of decedents from this cause during the year 1882 was 250, against 135 in 1881. Of these, 130 were males, and 120 were females. Nine are reported as under twenty years of age, 2 of which were under five. Fifty-five were over eighty, 99 between seventy and eighty, 40 between sixty and seventy, 27 between fifty and sixty, and the remainder under fifty. The months are all represented, the largest mortality being in July and December, each 26; then October, 25; August, 24; June, 23; May and April, 22; September, 20; November, 18; March, 17; January, 14; February, 13. The largest mortality by counties was, Rutland, 37; then, Windsor, 35; Windham, 32; Orleans, 22; Chittenden, 21; Addison, 20; Orange, 17; Franklin, 16; Bennington, 15; Caledonia and Washington, 12; Lamoille, 7; Essex, 3; Grand Isle, none. The percentage of decedents from this cause in 1882 was 04.50.

HEART DISEASE.—The decedents from this disease during the year 1882 were three hundred and fifty-seven (357). The number in 1881 was three hundred and fifty-five (355). In 1880 it was three hundred

and fourteen (314). Of these, 173 were males, and 184 were females. The equality of the sexes is noticeable. Forty-seven are reported as over eighty, 111 over seventy, 80 over sixty, 39 over fifty, 28 over forty, 19 over twenty, 18 under five, and 13 between five and twenty. By months the mortality was, March, 39; May, 34; January and August, each 32; April, 31; February, September, each 30; November, 29; December, 27; July, 26; June, 24; October, 22. By counties the mortality was, Windsor, 57; Rutland, 50; Chittenden and Windham, each 36; Orange, 28; Franklin, 25; Washington, 24; Addison, 20; Bennington, 18; Caledonia and Orleans, each 16; Lamoille, 15; Grand Isle, 3; Essex, 2. The percentage of decedents from this cause in 1882 was 06.51.

PNEUMONIA.—The number of decedents from this cause in 1882 was four hundred and thirty-four (434), of which two hundred and twenty (220) were males, and two hundred and fourteen (214) were females. This includes the decedents from Pneumonia-typhoides, which is a technical term for the low grade of fever which accompanies the Pneumonia. It does not include those decedents which are classed under the general head of "Lungs, disease of." The number of these during the year was *seventy-two*, of which 35 were males, and 37 were females. Thirty-four of these were under five years of age, 22 over sixty, 12 over twenty, and 2 over five. The largest mortality was in December, 11; and the smallest in July, April, and October. Of the decedents from Pneumonia, 87 were under five, 51 were over eighty, 96 were over seventy, 66 over sixty, 42 over fifty, 27 over forty, 33 over twenty, 13 over five, and 19 between five and twenty. The counties were represented as follows: Rutland, 66; Windham, 62; Caledonia, 47; Bennington, 44; Chittenden and Washington, each 40; Windsor, 39; Orleans, 35; Addison and Franklin, each 29; Orange, 28; Lamoille, 17; Grand Isle, 9; Essex, 7. The whole number of decedents from Pneumonia during the twenty-six years covered by these Registration Reports is eight thousand five hundred and forty-six (8,546), or an average of 336.4 per year. The table of ages of decedents shows that nearly one-half of them were over fifty years of age, that more than one-quarter were under five years of age. Pneumonia may, then, be considered as representing the extremes of age; whilst Consumption, which will next come under our observation, is more especially fatal to those of middle age.

CONSUMPTION.—The whole number of decedents from this cause during the year was seven hundred and eighty-six (786), of which two hundred and ninety-nine (299) were males, and four hundred and

eighty-seven (487) were females. In 1881 the number was eight hundred and twenty-one (821). The excess of females is a noticeable feature in the registration of this disease for several years past. The whole number of male decedents registered during the years 1857-1882 inclusive, was eight thousand and fifty-six (8,056), and the number of females was twelve thousand one hundred and ninety-five (12,195), an excess of females of four thousand one hundred and thirty-nine (4,139.) Of the decedents in 1882, 34 were over eighty, 90 were over seventy, 84 over sixty, 73 over fifty, 83 over forty, 112 over thirty, 169 over twenty, 55 over fifteen, 20 over ten, 10 over five, and 43 under five. The mortality by months was, April, 85; last year, June, 82; May, 83; June, 76; September, 74; April, 73; August and October, 70; January, 55; December, 51; November, 50; July, 49; February, 48. By counties the mortality was, Rutland, 90; last year, Chittenden, 96; Chittenden, 89; Caledonia, 75; Windsor, 72; Orange, 67; Windham, 66; Orleans, 63; Franklin, 61; Addison, 54; Washington, 53; Bennington, 49; Lamoille, 30; Essex, 13; Grand Isle, 3. Of the male decedents 109 were between fifteen and forty, and of the females, 235 were between those ages.

The percentage of decedents from Consumption during the year was 14.36. The uniformity of mortality from this disease one year with another is noticeable. It varies slightly from an annual average of eight hundred, and its congener, Pneumonia, slightly from an average of three hundred per annum. Neither of them belongs to the class of epidemics. Both, despite all the "preventives" and "cures" with which the country abounds, despite all the "theories" and "speculations" of medical science, marshal their usual number of victims at the close of each year. The first, Consumption, is the single cause of the greatest number of deaths recorded in the census of 1880 in the United States. The number reported was forty thousand six hundred and nineteen (40,619) males, and fifty thousand nine hundred and thirty-two (50,932) females, giving a proportion of 124.75 per thousand of all deaths, or a little over twelve per cent. Consumption and "diseases of the respiratory system" comprise the majority of decedents in all the States and Territories of the Union. Even those States the climate of which is alleged to be specially favorable to the cure or the amelioration of lung difficulties, report a larger number of decedents from these causes than from any other. Consumption and its congeners are the special inheritance of the United States, and there is no locality which can claim entire exemption from their fatality.

TYPHOID FEVER. — The number of decedents reported from this

cause during the year 1882 was one hundred and fourteen (114); last year one hundred and twenty-four (124). Of these, 61 were males, and 53 were females. Besides these, there were 45 decedents from "Fever," 13 males and 32 females; 12 from "Bilious Fever," 7 males and 5 females; 16 from "Gastric Fever," 3 males and 13 females; 1 from "Intermittent Fever," a female; 11 from "Puerperal Fever," females; and 2 from "Typhus Fever," females. The whole number of decedents from "Fever," therefore, reported during the year, was two hundred and one (201). The per cent of deaths from Typhoid Fever was 2.13. The largest proportion of the decedents was between the ages of fifteen and thirty, and in the three months, September, October, and November. By counties the mortality was the greatest in Rutland County, 18; then, Bennington, 14; Orleans and Orange, each 12; Washington and Windham, each 8; Windsor, Lamoille, Caledonia, each 7; Addison, 6; Essex, 5; Franklin and Grand Isle, each 1. By the census of 1880, the whole number of decedents reported from Typhoid Fever during that year in the United States was twenty-two thousand nine hundred and five (22,905), or in the proportion of 31.21 per thousand of all deaths. The fact is made prominent by that census, that Typhoid Fever is not especially a disease of the larger cities, but that it is "more prevalent in the small towns and rural districts which have no general water-supply or systems of sewerage, but obtain their water from springs and wells, and observe the usual custom of storing excreta in cesspools or vaults." In the larger cities, sanitary precautions are understood to be of vital importance, and are more or less thoroughly carried into effect; but in the country, rural districts, little attention is paid to such means of preventing contagion. And hence the difference in mortality, the cities showing a mortality of about 16.0 to 22.0 per thousand, while in the rural districts the deaths amounted to 19.0 to 30.0 per thousand, — an unanswerable argument in favor of a State Board of Health.

DIPHTHERIA. — The number of decedents from this cause during the year 1882 was two hundred and four (204), of which one hundred and one (101) were males, and one hundred and three (103) were females. In 1881 the number was two hundred and thirty-three (233). Of this number 94 were under five years of age, 53 under ten, 26 were between ten and fifteen, 14 between fifteen and twenty, and the balance were over twenty, including 1 over eighty. During the first six months of the year, the decedents were 109; during the latter half, 95. By counties the mortality was, Caledonia, 39; Washington, 35; Addison, 21; Orange, 20; Rutland, 18; Chit-

tenden, 15; Bennington, 14; Orleans, 11; Franklin, 10; Windham, 8; Essex and Windsor, each 6; Grand Isle, 2; Lamoille, none. The census for 1880 shows that the proportion of deaths in the United States during that year was 52.32 per thousand; and that, of the number, twenty thousand and thirty-five (20,035) were under five years of age. The largest mortality was in the smaller towns and rural districts, varying from 46.0 per thousand in the cities, save New Orleans, to 84.0 per thousand in the rural districts. In New Orleans the mortality was 13.74 per thousand, while in the remainder of the State it was 12.27 per thousand, — a difference owing mainly to sanitary arrangements.

SCARLATINA. — The number of decedents from this cause during the year 1882 was only eighty-two (82), a large decrease from last year, when it was one hundred and thirty-eight (138). Of this number, 47 were males, and 35 were females. The mortality from both these epidemic and contagious diseases, *Diphtheria* and *Scarlatina*, is decreasing, mainly from the better knowledge of the sanitary precautions necessary for that purpose. It has come to be well understood that medical treatment is less important in the control of these diseases than sanitary measures; and that, without the latter, their work of death will continue indefinitely. Of the decedents, 43 were under five years of age, 29 were under ten, 8 under fifteen, and 1 under twenty. The largest mortality was in the months of March and June, the least in July and August, and in Windsor, Rutland, and Bennington Counties.

The main facts in the history of this disease, from 1857 to 1882 inclusive, are presented in the following table:—

| YEARS. | Number of Deaths. | Per cent Average. | Males. | Females. | Under 5. |
|------------------|-------------------|-------------------|--------|----------|----------|
| 1857-1861. . . . | 898 | 5.04 | 451 | 445 | 576 |
| 1862-1866. . . . | 1,010 | 4.45 | 502 | 548 | 586 |
| 1867-1871. . . . | 546 | 2.60 | 301 | 244 | 366 |
| 1872-1876. . . . | 1,386 | 2.63 | 699 | 687 | 855 |
| 1877 | 60 | 0.10 | 33 | 27 | 39 |
| 1878 | 37 | 1.23 | 19 | 18 | 19 |
| 1879 | 56 | 1.08 | 27 | 29 | 35 |
| 1880 | 96 | 1.83 | 53 | 43 | 71 |
| 1881 | 138 | 2.50 | 68 | 70 | 93 |
| 1882 | 82 | 4.49 | 47 | 35 | 43 |
| Totals | 4,309 | — | 2,200 | 2,146 | 2,693 |

Contrary to the rule which Diphtheria is ascertained, by the census of 1880, to follow, the greatest mortality from Scarlatina in this State occurs in the centres of population, rather than in the rural districts. The mortality is comparatively small outside of the more thickly settled localities.

BRIGHT'S DISEASE. — The decedents from this disease are increasing. The number for 1882 was eighty-six (86), against 59 in 1881. Of these, 52 were males, and 24 were females. Of the males, 40 were over sixty years of age, and of the females, 22 were over forty. The active mortality from *Kidney Diseases*, including *Diabetes*, which is near akin to *Bright's Disease*, during the year, was one hundred and seventy-three (173), of which 118 were males, and 55 were females. Of those dying from *Diabetes*, 18 were males, and 5 were females; 14 were under thirty years of age, and 9 over fifty. Of the decedents from *Kidney Disease*, 48 were males, and 16 were females, and 49 were over sixty years of age; 32 died in the first half of the year, and 32 in the last half of the year. Of the decedents from *Diabetes*, none died in January or November; 2 in June; 10 in February, March, April, and May; and 11 in the remaining months of the year. Of those dying from *Bright's Disease*, the largest number was in March, 10, and the least in May, 3. Diseases of the kidneys are evidently increasing in the State; and the precautions which life-insurance companies are taking to require an examination of the urine as a preliminary in issuing policies, is not only proper, but necessary. The question, Why are these diseases so prevalent? is one which ought to receive careful consideration by the medical profession. How to prevent these diseases is full as important as how to cure them, for medical treatment seldom avails much against their progress.

CHOLERA INFANTUM. — The number of decedents from this cause during the year 1882 was one hundred and thirty-two (132), against one hundred and seventy-one (171) in 1881. Of these, 82 were males, and 50 were females, and all save one under five years of age. The majority died in the months of August and September, 32 and 47 respectively; 12 died in July, and 14 in October. The largest mortality was in Rutland County, 27, and the least in Orleans County, 2. Grouping together the diseases peculiar to infancy, we find that 918 died under one year of age, 216 from one to two years, 108 from two to three, 89 from three to four, and 79 from four to five; or that 25.72 per cent of all decedents were under five years of age. Of these, 750 were males, and 613 were females. By counties, the mortality is shown in the following table: —

| COUNTIES. | Males. | Females. | Totals. |
|----------------------|--------|----------|---------|
| Rutland | 109 | 98 | 207 |
| Chittenden | 103 | 98 | 201 |
| Franklin | 72 | 46 | 118 |
| Caledonia | 61 | 56 | 117 |
| Windsor | 66 | 42 | 109 |
| Washington | 57 | 44 | 101 |
| Orleans | 53 | 44 | 97 |
| Bennington | 41 | 49 | 90 |
| Windham | 46 | 40 | 86 |
| Addison | 47 | 35 | 82 |
| Orange | 48 | 28 | 76 |
| Lamoille | 21 | 14 | 35 |
| Grand Isle | 15 | 12 | 27 |
| Essex | 11 | 6 | 17 |
| Totals | 750 | 613 | 1,363 |

CANCER.—The number of decedents from this cause during the year 1882, was one hundred and seventy-five (175), of which 58 were males, and 117 were females. In 1881 the number was 147 (50 males and 97 females). The preponderance of females is a noticeable feature of the mortality in this disease. One hundred and thirty-six are reported as simply *Cancer*, of which 99 were males, and 37 were females. Of these, 14 were over eighty years of age, 35 between seventy and eighty, 39 between sixty and seventy, 22 between fifty and sixty, 11 between forty and fifty, 10 between thirty and forty, and 1 under five. The months are all represented, varying from 17 in September to 8 in November. Five decedents are reported from *Cancer of the Breast*, one of which was a male over seventy years of age; 2 of the *Face*, both males; 25 of the *Stomach*, 18 males (all save 2 over sixty years of age) and 7 females (all save 1 over sixty); 7 of the *Uterus*, one under five, a mistake probably; the remainder over thirty years of age. The greatest mortality was in September, 18; August, 14; then, January, October, July, and December, each 13; May, April, each 12; March, February, each 11; November, 9; June, 8. The order of counties was, Windsor, 28; Rutland, 27; Chittenden, 22; Washington, 17; Caledonia, 14; Orange and Orleans, each 13; Windham, 11; Addison and Essex, each 10; Bennington, 7; Lamoille, 5; Grand Isle, 1; Essex, none.

BRAIN DISEASES.—Under this head are included all diseases of the brain not special to infancy. The number was one hundred and forty-

seven (147), of which 77 were males, and 70 females. All ages are represented, from infancy to over eighty, and all the months of the year, from 18 in March to 5 in February. The number in 1881 was 96. The decedents from *Apoplexy* were 84 (47 males and 37 females). The largest portion of the decedents were over sixty years of age, 27 between sixty and seventy, 26 between seventy and eighty, and 7 over eighty. The months were represented from 10 in February to 2 in July. The greatest mortality occurred in Bennington, Washington, and Windsor Counties, 12 in each; the smallest in Orleans, 1. The greatest mortality in Brain Diseases was in Rutland County, 33; then, in Franklin County, 21; Caledonia and Windsor, each 20; Windham, 17; Washington, 16; Bennington, 12; Chittenden, 11; Addison, Lamoille, Orange, each 9; Orleans, 8; Grand Isle, 2; Essex, 1. The mortality from this class of diseases is notably increasing in the State, and deserves careful consideration to determine the causes and the remedy.

In the class of diseases affecting the brain or its meninges, or referable to it, we find 7 decedents from *Epilepsy*, 3 males and 4 females; 5 from *Hydrocephalus*, 3 males and 2 females; ten from *Insanity*, 5 males and 5 females. And here, as looking upon the question of *Insanity* in its curative relations, we quote the following from the "London Times," relative to insanity in France:—

"One of the most striking features of modern French life is the rapid increase of insanity, the number of cases of which, and especially those induced by alcoholism, is becoming larger each year. During 1882, there were 13,434 admissions into the asylums, of which 10,184 were new cases; the total number under treatment in the year being 58,760, of which about 27,000 were men, and 31,000 women, showing that females are more liable to the disease. That they are less influenced by treatment is shown by the fact, that the average duration of treatment for men is 276 days, while for women it is 295. The following statistics represent the character of the brain diseases, and the average time that each class requires for supervision in the asylums: Simple insanity, 33,629 patients, average time, 287 days; softening of brain, and paralysis, 8,665, average time, 250 days; senile dementia, 4,495, average time, 289 days; idiots and cretins, 5,377, average time, 298 days. The latter, therefore, appears to be the most intractable form. In all France, there are only 61 public, and 42 private, asylums, of which 9 are for men only, and 14 women, the remainder being for both sexes. No less than 24 departments have no establishment whatever for the care and treatment of sane."

7-one decedents from *Cerebro Spinal Meningitis* are also ad, 22 males and 29 females. The majority of decedents his latter cause were under ten years of age, though 3 are d as over sixty. Deaths occurred in every month of the year, 5 from 6 in March, June, and July, to 2 in August.

ng the singularities of the registration for 1882, St. George no births, no marriages, and a decrease of its population in 4 four. Brighton reports no births, twenty-one marriages, and .ths. Brunswick and Maidstone report "no returns to be

Somerset and Baltimore report one birth in their population and 71 respectively, and one death. Four decedents from s are reported in Chittenden County, and one in Rutland

TWENTY-SEVENTH REPORT
TO THE
LEGISLATURE OF VERMONT,
RELATING TO THE
REGISTRY AND RETURNS
OF
BIRTHS, MARRIAGES, AND DEATHS
IN THE STATE
FOR THE YEAR ENDING DECEMBER 31, A.D. 1883.

PREPARED BY GEORGE NICHOLS,
SECRETARY OF STATE.

BOSTON:
PRINTED BY RAND, AVERY, & COMPANY.
1884.

13989.

REPORT.

STATE OF VERMONT.

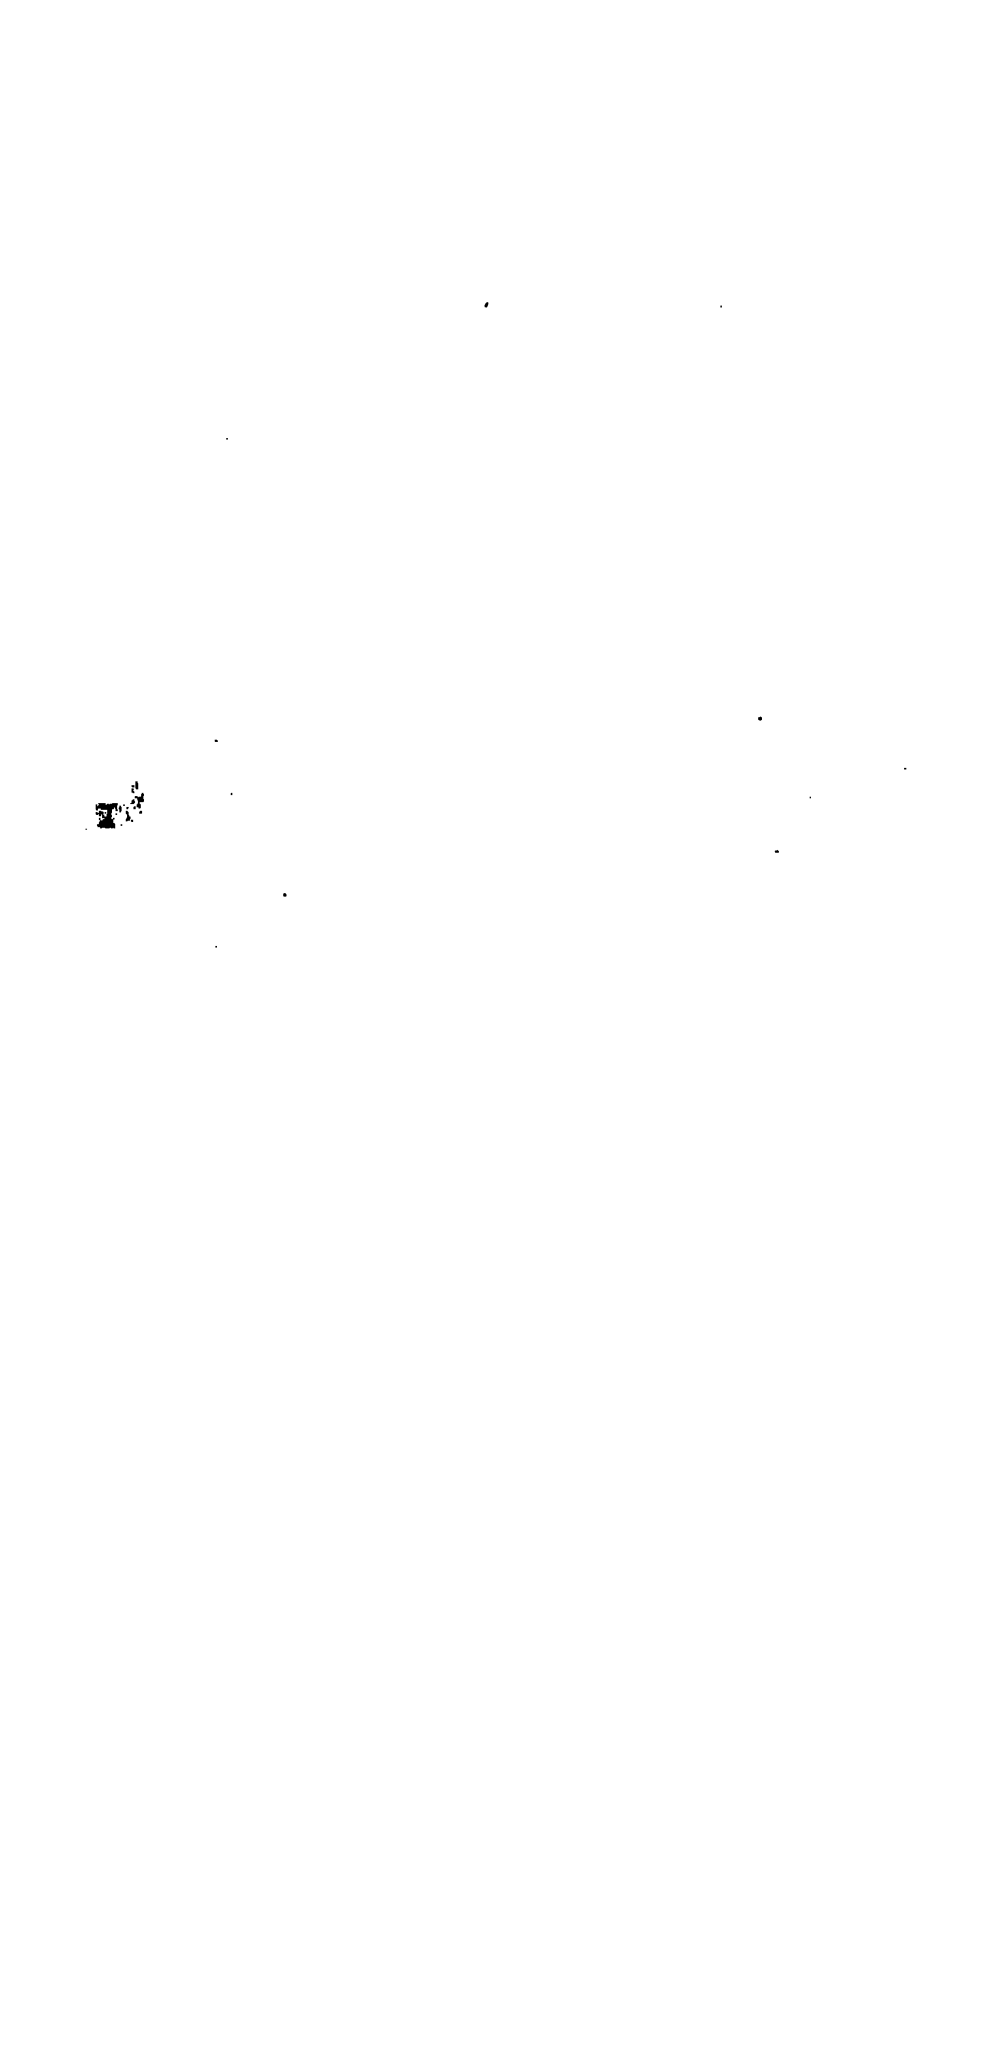

OFFICE OF SECRETARY OF STATE,
NORTHFIELD, Aug. 22, 1884.

GENERAL ASSEMBLY.

in compliance with the provisions of law, I have the honor to hereby submit the Twenty-seventh Annual Report relating to the
of Births, Marriages, Deaths, and Divorces that have
in the State during the year ending Dec. 31, 1883.

Very respectfully,

GEORGE NICHOLS,
Secretary of State.

CONTENTS.

TABLES.

| | PAGE |
|--|-------|
| I. GENERAL ABSTRACT. — Population in 1880, Births, Marriages, and Deaths, registered in each town, in 1883, distinguishing the sex and parentage of Births; the nativity of Marriages; the sex, aggregate and average ages; and the percentage of deaths | 2-17 |
| Recapitulation. — Births, Marriages, and Deaths by counties | 18-19 |
| II. BIRTHS. — Showing the number of each sex in the several counties during each month, with percentage | 20-21 |
| A. Supplement. — Plural Births by counties, by months, and by sex | 22 |
| B. Supplement. — Illegitimate Births by counties, by months, and by sex | 23 |
| III. MARRIAGES. — By counties and by months | 24 |
| IV. PERSONS MARRIED. — By ages and by conjugal conditions, | 25-27 |
| V. DEATHS. — By counties, by months, by sex, and parentage | 28-29 |
| VI. DEATHS ACCORDING TO AGE. — Showing the number of each sex at different ages in each town and county, with the population and percentage | 30-75 |
| Recapitulation. — Of Deaths, according to age and sex, with percentage | 76-77 |
| VII. CAUSES OF DEATH. — Alphabetically arranged, showing the number of each sex dying at different ages during the several months, with the various diseases | 78-85 |
| VIII. CLASSIFICATION OF THE CAUSES OF DEATH. — By counties, with the totals and percentage | 86-93 |
| IX. OCCUPATION. — Showing the number of those pursuing different avocations, the number of deaths in each, the ratio to the living, and the aggregate and average ages of those dying | 94-96 |

| | | |
|------------------------------------|--|----|
| X. | DIVORCES. — Exhibiting the number granted in each county, with the causes therefor; also, the ratio of divorces to marriages | 2 |
| XI. | DIVORCES. — Exhibiting the number granted in each county, arranged with special reference to the libellants, ... | 96 |
| RESULTS AND OBSERVATIONS | | |
| | General Summary | |
| | BIRTHS | |
| | Sex, with ratio thereof | |
| | Births to population, by counties, and number in each county | |
| | Number of births for each quarter | |
| | Plural births | |
| | Illegitimate births | |
| | Stillborn | |
| | Parentage, by counties | |
| | MARRIAGES | |
| | Nativity of those married | |
| | Social condition of those married | |
| | DIVORCES | |
| | DEATHS | |
| | Ages, average, with numbers at different ages | |
| | Sex, nativity, season | 10 |
| | CAUSES OF DEATH, General Classification. | |

RESULTS AND OBSERVATIONS.

1883.

GENERAL SUMMARY.

DURING the year ending Dec. 31, 1883, the whole number of births recorded in the State was six thousand five hundred and fifty-nine (6,559), of which three thousand four hundred and seventy-one (3,471) were males, and three thousand and seventy-seven (3,077) were females, eleven (11) unknown. Compared with 1882, the number of births was two hundred and twenty-nine (229) greater, and with 1881 it was two hundred and two (202) less. The difference in the proportion of the sexes was three hundred and ninety-four (394), in 1882 it was one hundred and fifty-one (151).

During the same period, the number of couples married was two thousand eight hundred and thirty-six (2,836), a number less by 47 couples than in 1882, when it was two thousand eight hundred and eighty-three (2,883).

The number of decedents for the same period was five thousand two hundred and four (5,204), of which two thousand five hundred and fifty-one (2,551) were males, and two thousand six hundred and eighteen (2,618) were females. Of 35 the sex is not stated. Compared with 1882 the number of decedents was 277 less, and with 1881 it was 353 less.

The population of the State by the census of 1880 was 332,286. There was, therefore, during the year, one birth to every 50.6 of the population, against one to every 52.5 in 1882, and one to every 49.1 in 1881. One person in every 73.3 was married during the year, against one to every 57.6 in 1882. There was one decedent to every 63.8 of the population, against one to every 60.6 in 1882, and one to every 59.0 in 1881. These figures indicate a decrease of mortality in the State for the last two years.

The following table groups together the main facts in the registration of births, marriages, and deaths during the twenty-seven years covered by these reports:—

102 TWENTY-SEVENTH REGISTRATION REPORT. [1883.

| YEARS. | Whole No. of Births. | Stillborn. | Living Births. | Marriages. | Deaths. |
|-----------------|----------------------|------------|----------------|------------|---------|
| 1857-1861 . . . | 34,682 | 645 | 32,037 | 11,391 | 18,753 |

| 1881 | 6,761 | 240 | 6,521 | 2,763 | 5,557 |
| 1882 | 6,331 | 223 | 6,108 | 2,883 | 5,481 |
| 1883 | 6,559 | 211 | 6,348 | 2,836 | 5,204 |
| Totals | 179,876 | 4,459 | 175,316 | 69,653 | 128,072 |
| Average | 6,662 | 157.3 | 6,493 | 2,580 | 4,743 |

BIRTHS.

In the following table we group together the whole number of births registered in the State during the twenty-seven years, 1857-1883 inclusive, together with the average birth-rate for five quinquennial periods, the annual for two years, population to one birth and number of each sex for the same periods :—

| YEARS. | Whole No. | Average Birth-rate. | Population to 1 Birth. | Males. | Females. | Unknown. |
|---------------|-----------|---------------------|------------------------|--------|----------|----------|
| 1857-1861 . . | 32,682 | 2.06 | 48.4 | 16,506 | 15,724 | 452 |
| 1862-1866 . . | 27,512 | 1.77 | 56.6 | 14,126 | 13,215 | 171 |
| 1867-1871 . . | 36,260 | 2.05 | 45.6 | 18,710 | 17,110 | 440 |
| 1872-1876 . . | 35,950 | 2.16 | 45.9 | 18,417 | 17,480 | 53 |
| 1877-1881 . . | 34,582 | 2.10 | 48. | 17,036 | 16,251 | 91 |
| 1882 | 6,331 | 1.95 | 52.4 | 3,239 | 3,078 | 14 |
| 1883 | 6,559 | 1.97 | 50.6 | 3,471 | 3,077 | 11 |
| Totals . . . | 179,876 | — | — | 91,505 | 85,935 | 1,232 |
| Average . . | 6,662 | — | — | 3,359 | 3,183 | — |

From the above tables it appears that the whole number of living births in the State during the twenty-seven years covered by these Registration Reports, is one hundred and seventy-five thousand three hundred and sixteen (175,316), which exceeds the whole number of decedents during the same period by forty-seven thousand two hundred and forty-four (47,244). These figures indicate an increase of the population of the State of more than 1,000 during the year 1883.

But the census of 1880 does not establish the fact. Vermont is depleted by emigration faster than the natural increase of population supplies the deficiency. The sons and daughters of Vermont are scattered all over the United States. They remain under the paternal roof only long enough to begin to feel the expansion and inspiration of youth, and to gather momentum from the rapid progress of the age, when they fly away like young birds from the mother's nest, — sail out upon the broad world, and try their own strength and nerve.

SEX. — The proportion of the sexes born during the year 1883 was one hundred and twelve (112) males to every one hundred females, or 55.4 males to 44.6 females.

The counties were prolific in proportion to population as follows : —

| Population. | Counties. | Births. |
|-------------|----------------|--|
| 32,792 | Chittenden . . | 807, or 1 birth to every 40.6 of its population. |
| 41,829 | Rutland . . | 958, " " 43.6 " " |
| 22,083 | Orleans . . | 464, " " 47.6 " " |
| 4,124 | Grand Isle . . | 105, " " 48.8 " " |
| 21,950 | Bennington . . | 449, " " 48.8 " " |
| 12,684 | Lamoille . . | 259, " " 48.8 " " |
| 23,607 | Caledonia . . | 481, " " 49. " " |
| 30,225 | Franklin . . | 609, " " 49.6 " " |
| 24,173 | Addison . . | 452, " " 53.2 " " |
| 7,931 | Essex . . | 141, " " 56.2 " " |
| 26,763 | Windham . . | 475, " " 56.3 " " |
| 25,404 | Washington . . | 450, " " 56.4 " " |
| 35,196 | Windsor . . | 589, " " 58.5 " " |
| 23,525 | Orange . . | 332, " " 70.8 " " |

In 1882 Grand Isle was the most prolific in proportion to population; this year, Chittenden takes the lead, and Grand Isle becomes fourth in the list. Orange is the least prolific, as it was also last year.

The greatest number of births in one month was in August, 636; last year, March, 576. Next in order are, September, 632; October, 607; July, 601; April, 550; March, 520; November, 519; December, 518; May, 510; June, 503; January, 452; February, 404. The number for the third quarter was the largest, 1,869, as in 1882; then follows the fourth, 1,641; then second, 1,563; then first, 1,376. The births in the last half of the year exceeded those in the first by 571; in 1882 the number in excess was 90; in 1881, 299. The order of counties was, Rutland, 958; Chittenden, 807; Franklin, 609; Windsor, 589; Caledonia, 481; Windham, 475; Orleans, 464; Addison, 452; Washington, 450; Bennington, 449; Orange, 332; Lamoille, 259; Essex, 141; Grand Isle, 105.

PLURAL BIRTHS. — The number of plural births reported for 1883 is 123, against 128 in 1882. Of these, 65 were males, and 58 were

females; 9 were triplets, — 2 in Caledonia County, 1 in Chittenden, 1 in Orange, 1 in Orleans, 3 in Rutland, and 1 in Washington. The largest number of these births was in Rutland County, 29; then, Caledonia and Chittenden, each 16; Bennington and Windsor, each 12; Orleans, 8; Addison, 6; Franklin, Washington, and Windsor, each 5; Lamoille, 4; Orange, 3; Grand Isle, 2; Essex, none.

ILLEGITIMATES. — Fifty-three (53) illegitimate births are recorded during the year, 19 males and 34 females. Seventy-six (76) were recorded in 1882, and 49 in 1881. Every county in the State is represented save Lamoille and Essex. Rutland County leads with 11; last year, Franklin led the list with 11; then follows, Windsor with 6; Windham and Chittenden, each 5; Addison, Bennington, Caledonia, Orleans, each 4; Franklin and Orange, each 3; Grand Isle and Washington, each 2. The whole number of these births reported during the twenty-seven years of this registration is one thousand four hundred and fifty-four (1,454), or about one in 124 of all births.

STILLBORN. — The number for 1883 is two hundred and eleven (211), against 223 in 1882. Of these, 123 are reported as males, and 88 as females.

PARENTAGE. — Four thousand seven hundred and sixty-seven (4,767) are recorded as American, one thousand six hundred and forty-four (1,644) as foreign, and 148 as unknown. In 1882 the number was four thousand six hundred and forty (4,640) American, and one thousand five hundred and twenty-seven (1,527) foreign. The proportion of these births does not vary much from year to year. The largest number was in Rutland County, 320, and in Chittenden, 299; these counties being the special centres of the foreign population, as they are also the manufacturing centres of the State.

MARRIAGES.

The whole number of marriages recorded during the year ending Dec. 31, 1883, was two thousand eight hundred and thirty-six (2,836), or only three more than in 1882. Of the persons married, four thousand six hundred and sixty-five (4,665) are reported as of American parentage, and nine hundred and forty-six (946) as of foreign parentage. In 1882 the number was four thousand eight hundred and twenty (4,820) of American parentage, and eight hundred and seventy-nine (879) of foreign parentage. The proportions are about the same for each year: the statistics do not show any marked increase of marriages of foreign parentage. Orleans, Franklin, and Chittenden take the lead in marriages among the foreign population, — 196, 179, and 116 respectively. Windsor, Rutland, and Chittenden

take the lead in marriages among the American population, — 528, 492, and 453 respectively.

Of the marriages recorded during the year, two thousand one hundred and forty-three (2,143) were the first marriage of both parties; 138 bachelors married widows; 338 widowers married maids; and 211 were the subsequent marriage of both parties. Of the first marriage of both parties, all save 18 were under forty years of age; and only 105 men married persons older than themselves; 1 between twenty and twenty-five married a maid between fifty and fifty-five; and 1 between sixty-five and seventy married a maid between thirty and thirty-five. Ten hundred and thirty-five between twenty and twenty-five married 455 maids under twenty; 509 from twenty to twenty-five; 61 from twenty-five to thirty; 3 from thirty to thirty-five; and 1 from thirty-five to forty. Seven hundred and twenty-seven between twenty-five and thirty married 195 under twenty; 359 between twenty and twenty-five; 151 from twenty-five to thirty; 14 from thirty to thirty-five; and 5 from thirty-five to forty-five.

Of the first of men, but subsequent of women, 1 man over sixty-five married a widow between thirty and thirty-five; 34 between twenty and twenty-five married 17 widows between twenty and twenty-five, 12 between twenty-five and thirty, 3 between thirty and thirty-five, and 1 over fifty; 40 between twenty-five and thirty married 1 under twenty, 14 from twenty to twenty-five, 11 from twenty-five to thirty, 8 from thirty to thirty-five, and 5 from thirty-five to forty. Few of the men married widows older than themselves, and this fact is noticeable in all the registration of this class of marriages. In the next class, "subsequent of men, but first of women," 56 men between twenty-five and thirty married only 1 older than themselves; 75 between thirty and thirty-five married 4 maids older than themselves; 119 from thirty-five to forty-five married 4 maids older than themselves; 1 man sixty to sixty-five married a maid over seventy. The large majority of these marriages were, however, with maids who were quite near or younger in age than the men. In the subsequent marriage of both parties, we find, as in 1882, a general disposition to seek partners of corresponding age. In one instance a widower between sixty-five and seventy married a widow over seventy; in others, 4 widowers between fifty-five and sixty married widows from sixty to sixty-five, and sixty-five to seventy; 1 between fifty and fifty-five married a widow sixty to sixty-five; and 1 forty to forty-five married a widow sixty-five to seventy. The largest number of marriages were registered in Rutland County, 296; then, Franklin, 292; Chittenden, 288; Windsor, 286; Orleans, 277; Washington,

240; Windham, 230; Caledonia, 206; Addison, 185; Orange, 169; Bennington, 130; Lamoille, 125; Essex, 85; Grand Isle, 27. The largest number by months was registered in November, 304; then, October, 295; December, 289; September, 273; January, 258; June, 228; May, 222; March, 215; April, 195; July, 181; February and August, each 178.

DIVORCES.

During the year ending Dec. 31, 1883, the number of divorces granted by the courts of Vermont was one hundred and seventy-three, an increase of eleven over 1882, when it was one hundred and sixty-two (162). It was one to every 16.4 of the whole number of marriages in the State. Of the "causes of divorce," 48, or less than one quarter, were for "adultery;" 38 for "intolerable severity;" 13 for "desertion;" 47 for "wilful desertion;" 2 for "bigamy;" 12 for "severity;" 8 for "refusal to support;" and 4 for a mixed cause, "wilful desertion and refusal to support." The number of "causes" is somewhat lessened, which may be regarded as an indication of an awakening public sentiment against divorces for any other cause than "adultery." The wife was the "libellant" in 109 instances, and the husband in 64. The largest number of divorces granted was in Rutland County, 24, or one in 12.3 of all marriages in the county; then, Windsor, 23, or one in 12.4; Windham, 22, or one in 10.5; Washington, 21, or one in 11.4; Orange, 20, or one in 8.5; Addison, 15, or one in 12.3; Franklin, 10, or one in 29.2; Chittenden, 8, or one in 36; Orleans, 7, or one in 39.6; Bennington, 7, or one in 18.6; Essex, 5, or one in 17; Caledonia, 4, or one in 51.5; Lamoille, 4, or one in 31.2; and Grand Isle, 3, or one in 9.

DEATHS.

The whole number of decedents registered during the year 1883 was five thousand two hundred and four (5,204), a decrease of two hundred and seventy-seven (277) from 1882, when the number was five thousand four hundred and eighty-one (5,481), and of three hundred and fifty-three (353) from 1881, when it was five thousand five hundred and fifty-seven (5,557). The number per quarter was one thousand three hundred and one (1,301); per month was four hundred and thirty-three and seven-tenths (433.7); per week was about one hundred; per day, a fraction over fourteen.

The death-rate for the year was 1.57 nearly. In 1882 it was 1.65.

AGES.—The aggregate ages given of all the decedents was two hundred and twenty-three thousand three hundred and sixteen (223,-

316); the average age was 43.42. In 1882 the average age of the decedents was 41.55. By counties, the average of the decedents was, Windsor, 58.11; Orange, 51.69; Addison, 49.38; Windham, 46.27; Washington, 43.72; Franklin, 41.64; Grand Isle, 41.27; Lamoille, 41.13; Caledonia, 40.60; Orleans, 39.39; Bennington, 37.82; Rutland, 37.09; Chittenden, 36.26; Essex, 32.35.

The decedents under one year of age were eight hundred and fifty-three. Deducting the "stillborn," the number of decedents under one year of age from disease was 642, or about one-eighth of the entire mortality of the State. The decedents from one to two years of age were 174; from two to five, 212; from one to five, 854, or about one-sixth of the whole number of decedents; from five to ten the number was 169; from ten to fifteen, 117; from fifteen to twenty, 184; from twenty to thirty, 410; from thirty to forty, 333; from forty to fifty, 328; from fifty to sixty, 359; from sixty to seventy, 578; from seventy to eighty, 779, or more than one-sixth of the entire mortality of the State; from eighty to ninety, 557; from ninety to one hundred, 109; over one hundred, 6.

The percentage of decedents by counties of both sexes is shown in the following table:—

| Counties. | Deaths. | Percentage. | Counties. | Deaths. | Percentage. |
|---------------|----------------|-------------|--------------|----------------|-------------|
| Addison . . | { Males, 174 | 1.44 | Lamoille . . | { Males, 99 | 1.54 |
| | { Females, 147 | 1.22 | | { Females, 105 | 1.51 |
| Bennington . | { Males, 158 | 1.43 | Orange . . | { Males, 177 | 1.49 |
| | { Females, 176 | 1.62 | | { Females, 192 | 1.65 |
| Caledonia . . | { Males, 192 | 1.60 | Orleans . . | { Males, 163 | 1.43 |
| | { Females, 184 | 1.56 | | { Females, 175 | 1.63 |
| Chittenden . | { Males, 285 | 1.76 | Rutland . . | { Males, 319 | 1.50 |
| | { Females, 306 | 1.83 | | { Females, 333 | 1.14 |
| Essex . . | { Males, 34 | 1.09 | Washington, | { Males, 237 | 1.88 |
| | { Females, 39 | 1.40 | | { Females, 231 | 1.80 |
| Franklin . . | { Males, 179 | 1.13 | Windham . . | { Males, 232 | 1.74 |
| | { Females, 168 | 1.10 | | { Females, 218 | 1.62 |
| Grand Isle . | { Males, 21 | 1.01 | Windsor . . | { Males, 259 | 1.49 |
| | { Females, 50 | 1.44 | | { Females, 277 | 1.56 |

Whole number of decedents, — males, 2,551; per cent, 1.53.

Whole number of decedents, — females, 2,618; per cent, 1.58.

In Vermont Asylum for the Insane, 39; unknown, 35.

Total, 5,204; per cent, 1.57.

SEX. — The number of decedents reported in 1883, not including those occurring in the Vermont Asylum for the Insane, many of which are doubtless reported in the towns whence such persons went to the asylum, was two thousand five hundred and twenty-nine (2,529) males, and two thousand six hundred and one (2,601) females, with thirty-five "unknown." The excess of females is only 72, against 90 in 1882, and 122 in 1881.

NATIVITY. — Four thousand four hundred and twenty-two (4,422) were of American parentage, and five hundred and fifty-six (556) of foreign parentage. One hundred and eighty-seven (187) are reported "unknown."

SEASON. — The order of months in mortality was as follows: March, 503, same as in 1882; then, April, 492; August, 484; September, 461; October, 448; December, 447; May, 434; July, 422; November, 393; June, 383; January, 363; February, 347. In 1882 the order was, March, September, April, August, October, May, June, December, November, January, February, July. The first six months of the year the mortality in the State was two thousand five hundred and twenty-two (2,522); the last six months, two thousand six hundred and fifty-five (2,655).

CAUSES OF DEATH.

We record the prevalence of no epidemic during the year 1883, nor has there been any in the State for several years past, — a fact which is somewhat remarkable when we call to mind the cold and hot waves which have passed over the State during the past few years in such quick succession, giving us the extremes of heat and cold in a brief period of time. Zymotic diseases have decreased in mortality somewhat during the three years past. During the year 1883, the number of decedents in this class was eight hundred and sixty-nine (869); in 1882 it was nine hundred and thirty-one (931); in 1881 it was one thousand one hundred and one (1,101); so that the decrease of mortality in this class in the three years past is two hundred and thirty-two (232). This marked decrease is doubtless owing to the agitation of the subject of sanitary and hygienic prevention of the diseases that are comprised in this class, and the consequent better instruction of the people in regard to them; and, if so, it is only an inkling, an indication, of what might have been done in the past, and what ought to be done in the future, to save the lives of the people from becoming an unnecessary prey to the two prevalent diseases of this class in our State. In the midst of a devastating epidemic, the people are wide awake to sanitary and hygienic measures. Why not, in anticipation of the epidemic, provide the means by which its devastations may be mitigated and lessened, if not wholly prevented? The percentage of decedents in this class is 1.67, against 1.70 in 1882, and 1.98 in 1881.

The number of decedents in the class *Constitutional* was one thousand and sixty-seven (1,067) in 1883, against one thousand one hundred and four (1,104) in 1882, and one thousand one hundred and

fifty (1,150) in 1881,—a slight decrease during the three years. The percentage was 2.05, against 2.03 in 1882, and 2.06 in 1881.

In the class *Local*, the number of decedents was two thousand and five (2,005), against two thousand and sixty-five (2,065) in 1882. The percentage in this class was 3.85; in 1882 it was 3.76; and in 1881 it was 3.26.

The number of decedents in the class *Developmental* was seven hundred and ninety-five (795). In 1882 it was eight hundred and twenty-one (821), and in 1881 it was five hundred and twenty-eight (528). The percentage was 1.52; in 1882, 1.49; in 1881, 0.93.

In the class *Violent*, the number of decedents was one hundred and seventy-two (172), showing a slight decrease from 1882, when it was one hundred and eighty-six (186). The percentage in this class was 0.33 in 1883, 0.34 in 1882, and 0.35 in 1881.

The above table presents the fatality by months and at different ages from twelve principal causes of death during the year, and shows the period of the year in which the largest mortality takes place.

In this table, several things are noticeable,—the large preponderance of the female decedents from consumption over the males. This has been a notable fact for several years past. Nearly one-half of the mortality from this disease occurs between the ages of twenty and forty. The largest for any period is that between twenty and thirty. It is remarkable that so many persons should die of consumption between seventy and eighty.

In the following table we group together the number of decedents in each of sixteen diseases that are prevalent in the State, in the order of their fatality, since the commencement of these Registration Reports in 1857. The first column comprises the number of decedents in each disease from 1857 to 1876 inclusive; the second the numbers for 1877 to 1881 inclusive; the third and fourth for 1882 to 1888.

The following table comprises the diseases which cause the greatest bulk of the mortality in the State:—

| 1857-1876. | 1877-1881. | 1882. | 1883. |
|---------------------------------------|---------------------------------------|--------------------------------------|--------------------------------------|
| Whole number of decedents,

CAUSES OF DEATH IN DETAIL.

OLD AGE. — This can hardly be considered as a disease. The gradual wasting away of the powers of life is Nature's process of easing the pathway to the tomb, — liberating the spirit from its bondage in the body, as the daylight gradually passes into the darkness of night. Yet it is enumerated among the "causes of death;" but it gives an indication of the healthfulness of the Green Mountain climate, the tendency to longevity among the dwellers among the mountains, the green hills, and the pleasant valleys. The little town of Maidstone, located in the bold lumber-regions of North-eastern Vermont, with less than three hundred inhabitants, is the banner-town of the State for longevity, having sheltered William Masters, perhaps, during all his lifetime, or secured him as one of her citizens from a foreign shore, and buried him at last, after having survived a century, with eleven years and two months added to it; Brattleboro' is second in this list, with Sally Stockwell at 104 years and 5 months; Burlington is third, with Sarah Whipple at 103 years, 8 months, and 14 days; then Colchester, with Joseph Saville at 102 years, and Margaret Grovner at 101; then Swanton, with Joseph Graves at 101. The number of decedents recorded from this cause as "over eighty," is 309; in 1882 it was 317. The number of males was 199; of females, 214. The months were very nearly equally represented: the lowest, February, 26; the highest, April, 41; the average, 34.4 per month. By counties the numbers were, Windham, 55; Windsor, 47; Chittenden, 46; Washington, 45; Rutland, 41; Orange, 38; Addison, 32; Franklin, 26; Caledonia, 24; Orleans, 21; Bennington, 19; Lamoille, 10; Essex, 6; Grand Isle, 3. The percentage of deaths from this cause was 0.79, against 0.75 in 1882.

PARALYSIS. — The number of decedents from this cause during the year was two hundred and twenty-six (226), of which ninety-seven were males, and one hundred and twenty-nine were females. One is reported as under five years of age, and 1 five to ten; 58 were over eighty; 80 were between seventy and eighty; 52 between sixty and seventy; 20 between fifty and sixty; and the remainder were under fifty. As compared with 1882, the mortality from this cause was 24 less, and 9 less than in 1881. By counties the mortality was as follows: Windsor, 37; Windham, 28; Rutland, 25; Chittenden and Orange, each 22; Addison, 18; Washington, 16; Bennington, 14; Caledonia, 13; Lamoille and Orange, each 10; Franklin, 8; Grand Isle, 4; Essex, 1.

HEART DISEASE. — The decedents from this cause during 1883

numbered three hundred and seventy-nine (379), of which two hundred and fourteen (214) were males, and one hundred and sixty-five (165) were females. The number for 1882 was 357. The number has been gradually increasing for some years past. So far as locality is concerned, the largest mortality occurred in Rutland and Windsor Counties, each 50; then, Windham, 39; Addison, 33; Chittenden, 32; Orange and Washington, each 29; Bennington, 26; Franklin, 24; Orleans, 23; Lamoille, 19; Caledonia, 18; Grand Isle, 6; Essex, 3. By months the mortality was, May, October, and December, each 40; July, 35; April and September, each 34; February and March, each 31; January, 28; August, 24; June, 22; November, 20. By age it was, between seventy and eighty, 98; between sixty and seventy, 87; over eighty, 42; between fifty and sixty, 40; between thirty and forty, 22; under five, 20; between twenty and thirty, 13; between fifteen and twenty, 7; and between five and fifteen, 8.

PNEUMONIA. — The mortality from this cause was five hundred and twenty-nine (529), of which two hundred and fifty-six (256) were males, and two hundred and sixty-five (265) were females. The equality of the sexes will be noticed in contrast with the record in Consumption. In 1882 the number was 434, showing an increase of 95 in the number of decedents from this cause during the year 1883. The largest mortality was in March, 96; then, April, 92; May, 53; December, 48; January, 44; November, 41; February, 37; June, 35; October, 31; July and September, each 17; August, 8. During the spring months, the mortality was 241, or nearly one-half; during the winter months, 129; during the fall months, 89; during the summer months, 60. The coming spring and the opening year are the most fatal periods in Pneumonia. By counties the mortality was as follows: Rutland, 63; Windsor, 54; Caledonia, 51; Washington, 50; Orange, 49; Chittenden, 42; Windham, 41; Franklin, 34; Orleans, 33; Addison, 32; Bennington, 28; Lamoille, 26; Essex, 12; Grand Isle, 5.

The aggregate of all decedents from this cause during the years 1857–1883 inclusive, at different ages in five quinquennial periods, 1857–1881, and also the numbers for 1882 and 1883, will be found in the following table: —

| YEARS. | Under 5. | 5 to 10. | 10 to 15. | 15 to 20. | 20 to 30. | 30 to 40. | 40 to 50. | 50 to 60. | 60 to 70. | 70 to 80. | Over 80. | Unknown. |

CONSUMPTION. — The number of decedents from this cause during the year 1883 was seven hundred and sixty-three (763), against 786 in 1882. Of these, 284 were males, and 479 were females. Thirty-three are reported as under five years of age, 2 between five and ten, 22 over ten, 55 over fifteen, 188 over twenty, 124 over thirty, 73 over forty, 60 over fifty, 82 over sixty, 81 over seventy, 33 over eighty, and 9 of unknown age. By months the mortality was as follows: March, 89; May, 80; August, 75; April, 70; June and July, each 66; December, 64; November, 55; October, 53; January, 52; September, 47; February, 45. By counties, Chittenden, 105; last year 8, Rutland; then, Rutland, 89; Washington, 76; Windham, 73; Windsor, 62; Orleans, 56; Caledonia, 55; Franklin, 54; Bennington, 52; Orange, 48; Addison, 42; Lamoille, 31; Grand Isle, 12; Essex, 7.

The following table shows the aggregate of all the decedents from this cause in five quinquennial periods at different ages, from 1857 to 1881 inclusive, and also the numbers for 1882 and 1883:—

| YEARS. | Under 5. | 5 to 10. | 10 to 15. | 15 to 20. | 20 to 30. | 30 to 40. | 40 to 50. | 50 to 60. | 60 to 70. | 70 to 80. | Over 80. | Unknown. |
|-----------------|----------|----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|----------|----------|
| 1857-1861 . . . | 193 | 37 | 70 | 346 | 943 | 544 | 415 | 329 | 408 | 321 | 115 | 95 |
| 1862-1866 . . . | 165 | 39 | 103 | 291 | 768 | 609 | 368 | 347 | 405 | 380 | 150 | 66 |
| 1867-1871 . . . | 197 | 40 | 64 | 289 | 908 | 590 | 408 | 395 | 446 | 393 | 153 | 40 |
| 1872-1876 . . . | 177 | 28 | 75 | 355 | 992 | 612 | 390 | 409 | 435 | 445 | 140 | 28 |
| 1877-1881 . . . | 145 | 30 | 87 | 351 | 961 | 620 | 414 | 381 | 405 | 425 | 139 | 19 |
| 1882 | 43 | 10 | 20 | 55 | 169 | 112 | 83 | 73 | 80 | 97 | 54 | - |
| 1883 | 33 | 2 | 22 | 45 | 188 | 124 | 73 | 61 | 82 | 81 | 33 | 9 |
| Totals . . . | 953 | 186 | 441 | 1,732 | 4,929 | 3,211 | 2,151 | 1,995 | 2,261 | 2,142 | 764 | 257 |

TYPHOID FEVER. — The number of decedents reported from this cause for 1883 is ninety-nine (99), 52 males and 47 females. The num-

ber for 1882 was 114, indicating a decrease in the mortality from this disease. Besides these, 40 decedents are reported from *Fever*, 7 from *Bilious Fever*, 17 from *Gastric Fever*, 1 from *Puerperal*, 1 from *Remittent*, and 1 from *Typhus Fever*, making the whole number of decedents from *Fever*, 166, against 201 in 1882. The largest proportion of decedents from *Typhoid Fever* was between the ages of fifteen and thirty; from *Gastric Fever*, over forty. From *Fever*, all ages are represented. The majority of *Typhoid* patients died in the last half of the year: those from *Fever* were scattered about equally during the year. By counties the largest mortality was in Rutland, 20; then, Bennington, 13; Orange, 10; Addison and Washington, each 9; Chittenden and Windham, each 7; Caledonia, 6; Franklin and Windsor, each 5. It is a gratifying fact, that the mortality from this disease is decreasing; and that, where it is largely prevalent in any locality, few people die from it in comparison with its fatality in years past. At the present time, a half-dozen decedents represent nearly as many hundred cases of sickness from it; and its virulency is mitigated by the increased knowledge of hygienic and sanitary precautions.

DIPHTHERIA. — During the year 1883, only one hundred and twenty-seven (127) decedents from Diphtheria are reported in the State, showing a decrease in its mortality of 77, as compared with 1882, and of 106 as compared with 1881. Of these, 60 were males, and 67 were females; 46 were under five years of age, 39 were under ten, 20 were between ten and fifteen, 11 between fifteen and twenty, 6 between twenty and thirty, 2 between thirty and forty, 1 between forty and fifty, and 2 over sixty. By months the largest number died in November, 20; then, October, 17; December, 16. During the first six months of the year, the decedents were 49; during the last, the number was 78. By counties the largest number was in Chittenden, 18; then, Bennington and Washington, each 17; Caledonia, 16; Grand Isle, Orange, and Windham, each 10. The smallest mortality was in Essex County, 1. The mortality from this disease is measurably under the control of sanitary and hygienic arrangements, and these have become so well understood that the mortality from it is greatly lessened. It has not been epidemic in the State for many years. The registration does not indicate its presence as such in any portion of the State during the past five years.

SCARLATINA. — The number of decedents from this disease during the year 1883 was 67. In 1882 it was 82, in 1881 it was 138. Of the decedents in 1883, 31 were males, and 36 were females. Thirty-seven were under five years of age, 22 were five to ten, 6 were ten to

twenty, and 2 over twenty. The largest number of decedents was in Rutland County, 25; then, Windsor, 11. The smallest number, 1 each in Caledonia, Essex, and Orleans. By months the decedents were as follows: April, 14; January and February, each 9; March, 6; May, August, September, and December, each 4; June, July, October, and November, each 3. This disease and diphtheria alternate with each other in mortality, and are understood to be very nearly allied to each other in their distinctive epidemic characteristics. An epidemic of one is soon succeeded by an epidemic of the other.

BRIGHT'S DISEASE. — The number of decedents from this cause is the same as in 1882, 86, of which 52 were males, and 34 were females. Of the males, 2 were over eighty years of age, 14 over seventy, 11 over sixty, 13 over fifty, 4 over forty, 6 over fifteen, and 2 under five. Of the females, 17 were over fifty, 15 over twenty, 1 five to ten, and 1 fifteen to twenty. Ten died in each of the months of April, September, and December; 8 in February; 9 in March; 8 in January; 7 each in May, June, and November; 6 in October; 5 in August, and 3 in January. By counties, Rutland, 15; Windsor, 14; Bennington, 11; Chittenden, 7; Franklin and Windham, each 6; Caledonia, Orange, and Orleans, each 5; Addison, 3; Essex and Grand Isle, each 1; Lamoille, none. The entire mortality from *Kidney Disease*, including *Diabetes* and *Bright's Disease*, was 167. Of those designated as *Kidney Disease*, 43 were males, and 9 females, of whom 38 males were over sixty years of age, and 6 of the females over fifty. One male is recorded as "under five." Nine died in June; 8 in July; 6 in August; 5 in April; 4 each in March, September, and November; 3 each in January, February, and October; 2 in May; and 1 in December. In Addison County, 8 died; in Orange and Washington, each 7; in Rutland, 6; in Caledonia, Franklin, and Windsor, each 5. Of those designated as *Diabetes*, 13 were over sixty years of age, 7 were between thirty and fifty, 5 between fifteen and thirty, and 4 between five and fifteen. Seven died in December; 4 each in February and July; 3 each in January and August; 2 each in April, June, and November; 1 in October; and none in March and September.

CHOLERA INFANTUM. — This is only one of the group of diseases incident to infantile life. During the year, it has ended the mortal existence of one hundred and forty-six (146) children, all under five years of age save 1, the larger portion of them dying in the months of July, 20; August, 45; September, 45; October, 15. Rutland County records the largest number, 26; Orleans, 21; Windsor, 16; Chittenden, 15; Franklin, 12; Bennington, 11; Windham, 9; Caledonia, 8; Addison and Washington, each 7; Essex, 6;

Orange, 5 ; Grand Isle, 2 ; Lamoille, 1. Grouping together the diseases more peculiar to infancy, such as *Convulsions*, *Croup*, *Diphtheria*, *Dysentery*, *Fits*, *Hydrocephalus*, *Infantile*, *Cerebro Spinal Meningitis*, *Scarlatina*, *Teething*, we find that 853 died under one year of age, 174 from one to two years, 95 from two to three, 65 from three to four, and 52 from four to five ; or that 23.46 per cent of all the decedents in the State were under five years of age. The attention of the people of the State has been repeatedly directed to this great mortality of infant life. That in a civilized, Christian community there should be such a waste of human life as these facts and figures indicate, is an appalling fact. It ought to awaken the keenest interest in the inquiry, What is the cause? Where is the blame? The medical profession tell us, that, with proper care, food, and hygienic surroundings, there is no necessity that nearly one quarter of the mortality of the State shall be among the children under five years of age. Why is it so? What is the cause? There may be inherited diseases and weaknesses. If so, no human agency can prevent the result. There may be want of suitable nourishment, or plenty of healthy mother's milk. If so, the resources of medicine, properly administered, and of hygienic art, ought to aid in supplying it. There may be a violation of the laws of nature and of health, in respect to food, proper ventilation, and clothing. If any one, or all, of these, are admitted to be in any sense a cause for this large infantile mortality, it is apparent where the responsibility rests ; and it will never be materially diminished till the laws which govern the transmission of disease from father to son in successive generations, the laws of maternity and of hygiene, are better understood, and obeyed with more scrupulous exactness. In this matter has not the State as well as the individual a large responsibility? And can the State fulfil its duty to its citizens without placing at their service all the precautions and preventions which the progress of the age, in sanitary and hygienic science, demands, and have made possible?

CANCER.—The number of decedents from this cause was one hundred and forty-four (144), of which 45 were males, and 99 were females. Of the females, 10 were over thirty years of age, 18 over forty, 16 over fifty, 20 over sixty, 25 over seventy, and 8 over eighty. Of the males, 12 were over eighty, 12 were over seventy, 12 over sixty, 5 over fifty, 3 over forty, and 1 over thirty. Twenty died in July ; 16 in September ; 12 each in April, May, and August ; 11 each in March, October, and December ; 10 each in February, June, and November ; 9 in January. By counties, the mortality was, Windsor, 23 ; Windham, 22 ; Rutland, 21 ; Chitten-

den, 20; Orange, 16; Franklin and Washington, each 15; Addison, 14; Caledonia, 12; Lamoille, 9; Orleans and Bennington, each 8; Grand Isle, 3; Essex, 1. Besides this simple form of the disease, there was reported, *Cancer of the Bowels*, 1, over fifty years of age; *Cancer of the Breast*, 2, over fifty; *Cancer of Stomach*, 36, of whom 17 were males, and 19 females, all of whom were over forty; and *Cancer of the Uterus*, 4, 2 of whom were between twenty and thirty, and 2 between forty and sixty.

BRAIN DISEASES.—Under this head are included all diseases of the brain not special to infancy. Under the general term, one hundred and fifty-five (155) cases are recorded, of which 81 were males, and 74 were females, representing all ages, from under five to over eighty; and the months of the year, from 19 in October to 7 in January; and all the counties in the State, from Rutland, 34, to Essex, 2. The number of decedents from *Apoplexy* was 88, of which 51 were males, and 37 were females. One is reported as five to ten years of age, 14 were over eighty, 24 were over seventy, 23 were over 60, 10 were over fifty, 11 were over forty, and 4 over thirty. The months were all represented, from 10 in July, to 5 in January; and the counties also, from 13 in Windsor, to 1 in Caledonia.

In the class of diseases affecting the brain or its meninges, or referable to it, we find *Epilepsy* reported as the cause of 10 deaths, of which 5 were males, and 5 were females; 7 of these were over sixty years of age. Eight decedents are reported from *Hydrocephalus*, sexes equal; 8 from *Insanity*, 3 males, 5 females, all over thirty years of age; 13 from *Maniacal Exhaustion*, 8 males and 5 females, inmates of the Vermont Asylum for the Insane; 51 from *Cerebro Spinal Meningitis*, 25 males and 26 females (1 female over seventy, 2 males over fifty, the majority under ten years of age). The largest mortality was in Chittenden County, 10. The disease was not epidemic in the State. Deaths occurred in every month of the year, from 7 in April and August, to 2 in January and June. The same number of decedents was reported in 1882.

Among the singularities of the registration of 1883, the town of Brighton reports no births and no deaths, but 18 marriages. Brunswick reports no births, 2 marriages, 1 death. The population of this town has decreased from 221 in 1870 to 192 in 1880. Baltimore reports one birth in a population of 71.

The writer of this summary would impress upon those officials whose duty it is to make up the statistics which are embodied in this registration, the importance of doing it carefully and with accuracy,

especially that portion which relates to the "causes of death." Oftentimes these are returned as "unknown," when inquiry of the physician or the friends would enable the District Clerk to give the disease accurately. Oftentimes a "cause of death" is mentioned which is so indefinite that it conveys no information whatever as to the disease. For example, *Hemorrhage* is given as a "cause of death;" but it might as well have been given as "unknown," because it does not mention the locality from whence the hemorrhage came. If of the *Uterus*, or *Bladder*, or *Bowels*, or *Stomach*, it would be recognized and classified as a disease of one or the other of those organs. So also, *Catarrh*, as a cause of death, conveys no information of any value or correctness. So also, *Infantile*, *Neuralgia*, and others. The student of these statistics can neither gain nor impart any knowledge of disease by such indefinite terms as a cause of death; and a Registration Report filled up with such meaningless abstracts, would be worse than useless. More care should be exercised on the part of District and Town Clerks in making the returns.

LAWS OF VERMONT RELATING TO REGISTRATION.

[Chapter 128 of the Revised Laws of Vermont, and Acts passed since the Revision relating thereto.]

REGISTRATION OF BIRTHS, MARRIAGES, DIVORCES, AND DEATHS.

DUTIES OF SCHOOL-DISTRICT CLERKS.

SECTION 2547. The school-district clerks in each town, or, in towns not divided into districts, the clerk of the school board, shall annually, in the month of January, ascertain the births and deaths which occurred in their respective districts during the year next preceding the first day of January; and shall report to the town clerk on or before the first day of February the date and place of birth of each child, its name and sex, the names and residence of its parents, and the occupation of the father. They shall also report the date, place, and disease or apparent cause of each death, the name and sex of the deceased, whether married or single, his age in years, months, and days, place of birth, the name of his parents, and his occupation if over fifteen years of age.

SECT. 2548. If a district clerk or clerk of school board fails to make the required return, or makes an incomplete or incorrect return, he shall forfeit all compensation therefor, and be fined not less than five dollars; and the town clerk shall forthwith cause prosecution to be commenced against him in the name of the state to recover such penalty.

SECT. 2549. So much of this chapter as relates to the duties of school-district clerks in collecting and making returns of births and deaths shall not apply to the city of Burlington.

DUTIES OF TOWN CLERKS.

SECT. 2550. Town clerks shall carefully examine the returns of births and deaths made to them by the clerks of the several school-districts; and, if the returns are made up and returned agreeably to law, they shall furnish the school-district clerk so complying with the requirements of law a certificate to that effect; and, on presentation of such certificate to the selectmen, they shall draw an order on the

town treasurer to pay such school-district clerk or clerk of school board fifteen cents for each birth or death returned.

SECT. 2551. Town clerks shall number and record in the order in which they are received, the returns of births, marriages, and deaths made to them; and the record shall show the time when it was made. They shall annually, in the month of March, transmit to the secretary of state a certified copy of such record made for the year next preceding the first day of January.

SECT. 2552. The clerk of each town shall receive from the treasury of the town five cents for recording each birth and death, and ten cents a folio for copying the same and the marriage records in his office, for the use of the secretary of state; provided said clerks comply with the provisions of this chapter in all respects.

SECT. 2553. If a town clerk fails to comply with the requirements of law in relation to making returns of births, marriages, and deaths to the secretary of state, he shall be fined not less than twenty dollars.

DUTIES OF COUNTY CLERKS.

SECT. 2554. The clerks of the county courts shall on the last day of December in each year make return to the secretary of state of the number of divorces granted in their respective counties during the year ending on that day.

DUTIES OF THE SECRETARY OF STATE.

SECT. 2555. The secretary of state shall prepare and furnish to town clerks blank forms to be used as books of records, according to the provisions of this chapter, and also blank forms of returns, and shall accompany the same with the necessary instructions and explanations; and the town clerks shall distribute the same as directed by the secretary.

SECT. 2556. The secretary of state shall receive the returns made to him in pursuance of this chapter, and cause the same to be bound in one or more volumes, with indexes thereto; and, with such assistance as is voluntarily rendered by any committee appointed by the Vermont Medical Society for that purpose, prepare therefrom such tabular results as will render them of practical utility, and make a report thereof biennially to the general assembly; and one thousand copies of the report shall be biennially published, bound in cloth. (*Amended by No. 64, Acts of 1882.*)

SECT. 2557. The secretary of state shall cause prosecutions to be commenced in the name of the state, in an action on the case founded on this chapter, to recover any penalty or forfeiture imposed by the provisions therein whose recovery is not otherwise provided for.

MISCELLANEOUS.

SECT. 2558. A physician who attended upon a deceased person, shall leave with the town clerk a certificate containing the name of the disease or cause of such death within fifteen days after the interment of the deceased; and a medical attendant who fails to give such certificate shall be fined three dollars, for the use of the town where the offence is committed. (*Repealed by No. 63, Acts of 1882.*)

SECT. 2559. When a male resident of this state is married without the state, he shall within sixty days deposit with the clerk of the town where he resides, a certificate embracing the statistics required by law in marriage certificates; and, if he does not deposit such certificate, he shall forfeit not less than ten dollars.

SECT. 2560. The head of a family who moves into, and becomes a permanent resident of, this state, may cause to be recorded in the office of the clerk of the town where such residence is, a certificate of his marriage embracing the statistics required by law; and may also cause to be recorded the birth of any of his children born without the state, with the statistics relating to such births required by law, and shall make oath to the correctness of such statistics. But such record shall not be returned to the secretary of state.

SECT. 2561. Town clerks shall record matter submitted to them for record under the two preceding sections, and shall receive the same fees for such record as provided by law for similar records.

AN ACT TO REPEAL SECTION TWO THOUSAND FIVE HUNDRED AND FIFTY-EIGHT, CHAPTER ONE HUNDRED AND TWENTY-EIGHT OF THE REVISED LAWS OF VERMONT, ENTITLED "REGISTRATION OF DEATHS."

It is hereby enacted by the General Assembly of the State of Vermont:—

SECTION 1. Section two thousand five hundred and fifty-eight of the revised laws of Vermont is hereby repealed.

SECT. 2. This act shall take effect upon its passage.

Approved Nov. 1, 1882.

AN ACT PROVIDING FOR BETTER REGISTRATION OF MARRIAGES.

It is hereby enacted by the General Assembly of the State of Vermont:—

SECTION 1. The secretary of state is hereby authorized and required to furnish, at the expense of the state, a suitable book for recording marriages for each town in the state, and forward the same to the town clerk of each town as soon as he is able to do so.

Said books shall be conveniently arranged, with printed blanks corresponding to the marriage certificates that are used, with the proper space underneath for the attestation of the record by the town clerk, and a proper space for an index to each book.

SECT. 2. It is hereby made the duty of the town clerks in the state to keep a full record of the marriages in their respective towns according to the returns of the certificates.

Approved Nov. 17, 1882.

AN ACT RELATING TO THE PRINTING OF THE REGISTRATION REPORT
OF THE STATE.

It is hereby enacted by the General Assembly of the State of Vermont:—

SECTION 1. The secretary of state is hereby authorized and directed to contract for and procure the printing and publication of the registration of births, marriages, and deaths of the state, annually, on or before the first day of October in each year.

SECT. 2. This act shall take effect upon its passage.

Approved Nov. 14, 1882.

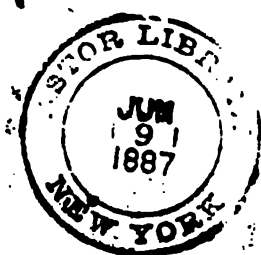

TWENTY-EIGHTH REPORT
TO THE
LEGISLATURE OF VERMONT,
RELATING TO THE
REGISTRY AND RETURNS
OF
BIRTHS, MARRIAGES, AND DEATHS
IN THE STATE

FOR THE YEAR ENDING DECEMBER 31, A.D. 1884.

PREPARED BY CHARLES W. PORTER.
SECRETARY OF STATE.

BOSTON :
PRINTED BY RAND, AVERY, & CO.

24590 -

REPORT.

STATE OF VERMONT.

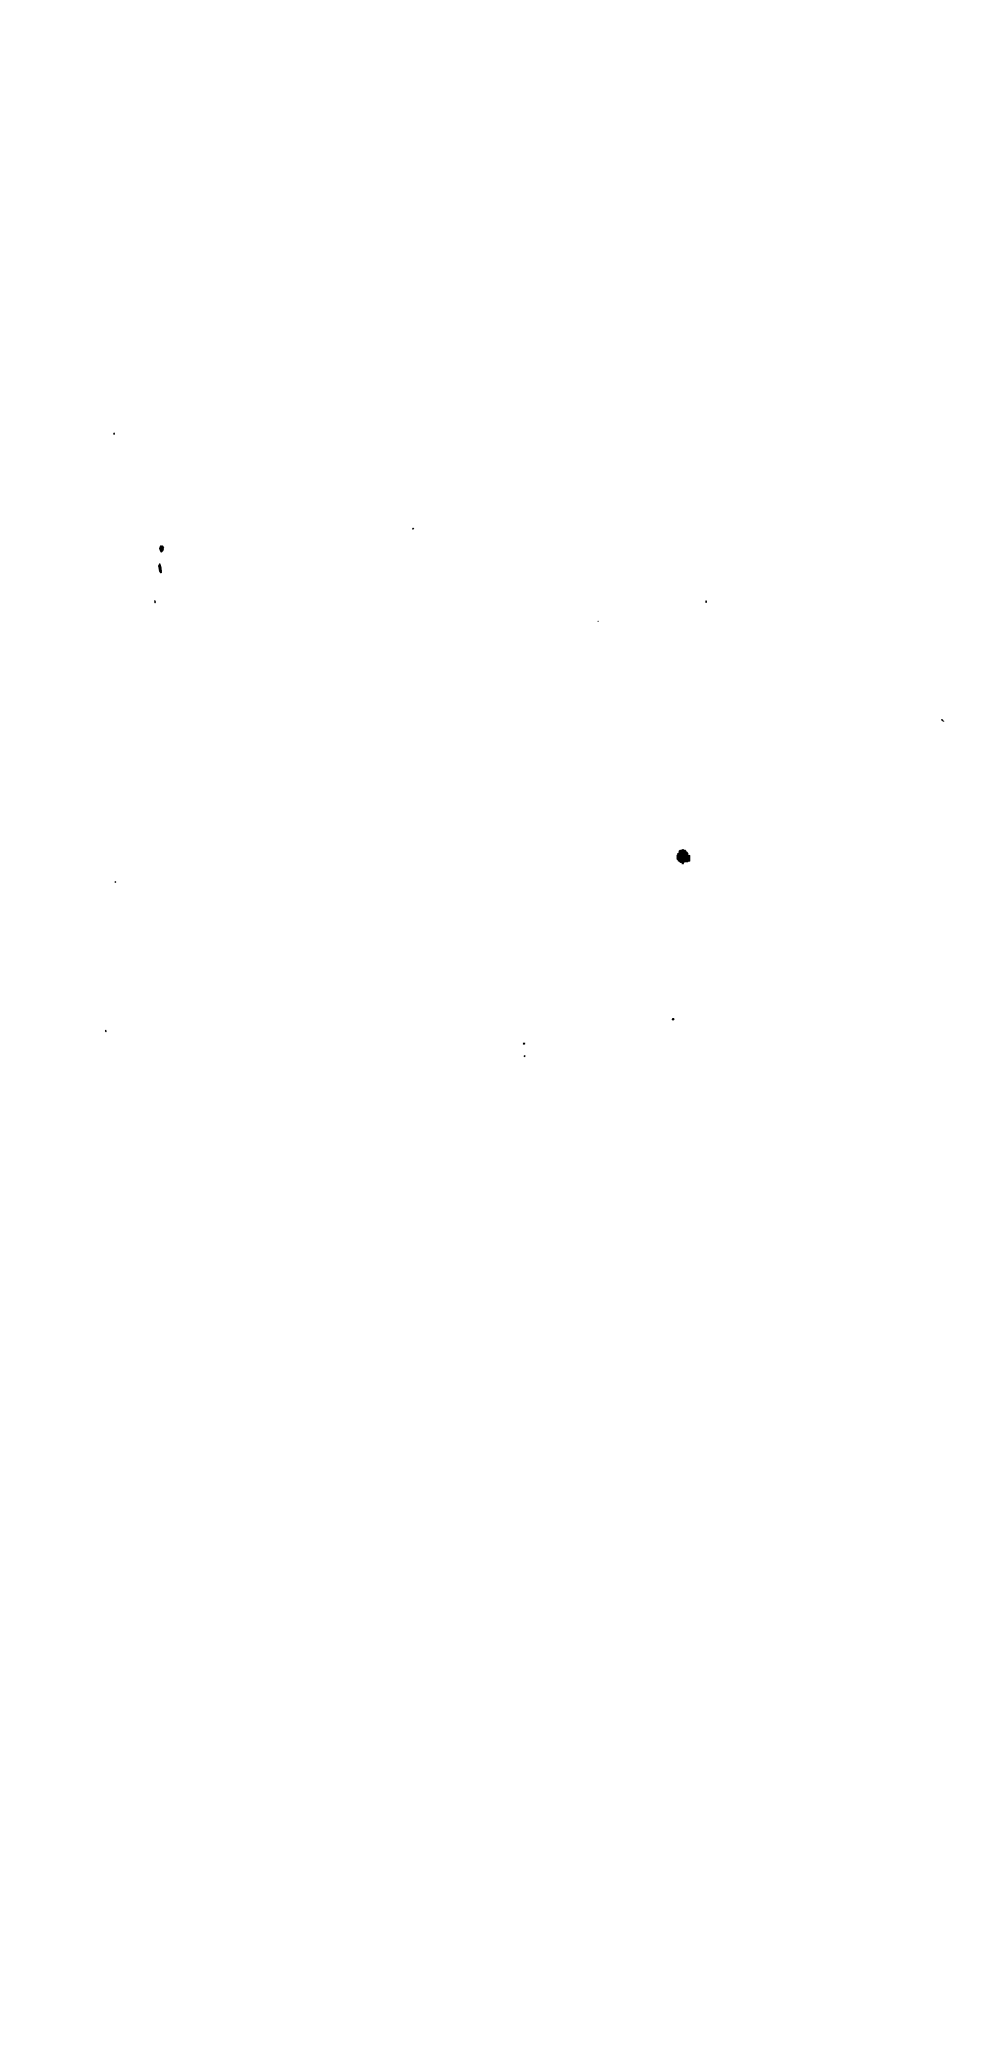

OFFICE OF SECRETARY OF STATE,
MONTPELIER, May 1, 1886.

TO THE GENERAL ASSEMBLY.

In compliance with the provisions of law, I have the honor to herewith submit the Twenty-eighth Annual Report relating to the Registry of Births, Marriages, Deaths, and Divorces that have occurred in the State during the year ending Dec. 31, 1884.

Very respectfully,

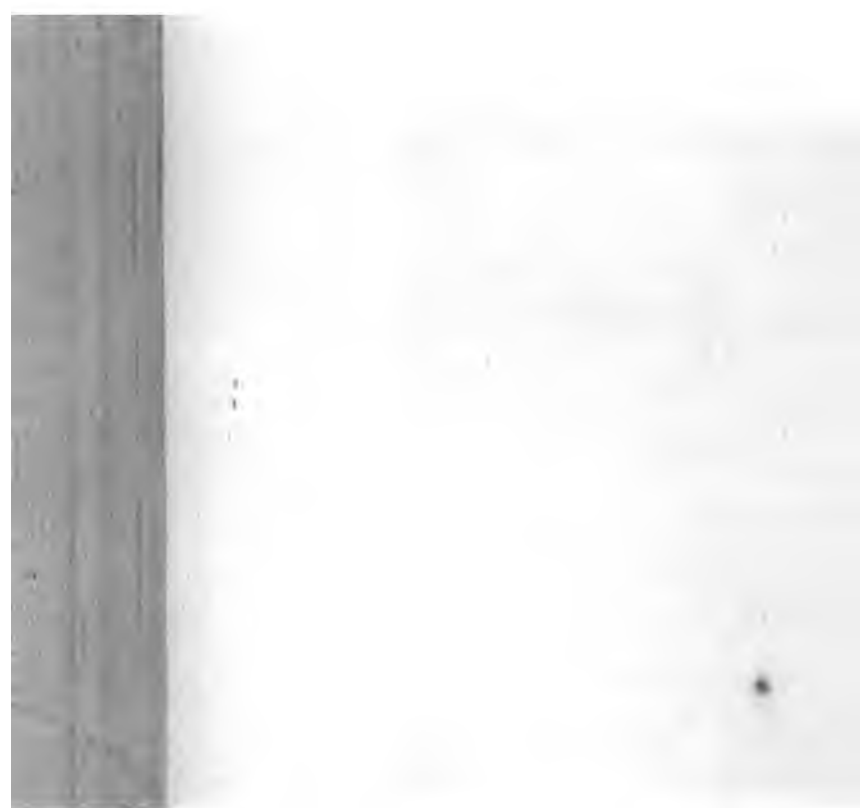

CHARLES W. PORTER,
Secretary of State.

CONTENTS.

TABLES.

| | PAGE |
|--|--------|
| I. GENERAL ABSTRACT. — Population in 1880; Births, Marriages, and Deaths, registered in each town, in 1884, distinguishing the sex and parentage of Births; the nativity of Marriages; the sex, aggregate and average ages; and the percentage of deaths | 2-17 |
| <i>Recapitulation.</i> — Births, Marriages, and Deaths by counties | 18-19 |
| II. BIRTHS — Showing the number of each sex in the several counties during each month, with percentage | 20-21 |
| <i>A. Supplement.</i> — Plural Births by counties, by months, and by sex | 22 |
| <i>B. Supplement.</i> — Illegitimate Births by counties, by months, and by sex | 23 |
| III. MARRIAGES. — By counties and by months | 24 |
| IV. PERSONS MARRIED. — By ages and by conjugal conditions, ... | 25-27 |
| V. DEATHS. — By counties, by months, by sex, and parentage | 28-29 |
| VI. DEATHS ACCORDING TO AGE. — Showing the number of each sex at different ages in each town and county, with the population and percentage | 30-75 |
| <i>Recapitulation.</i> — Of Deaths, according to age and sex, with percentage | 76-77 |
| VII. CAUSES OF DEATH. — Alphabetically arranged, showing the number of each sex dying at different ages during the several months, with the various diseases | 78-89 |
| VIII. CLASSIFICATION OF THE CAUSES OF DEATH. — By counties, with the totals and percentage | 90-97 |
| IX. OCCUPATION. — Showing the number of those pursuing different avocations, the number of deaths in each, the ratio to the living, and the aggregate and average ages of those dying | 98-100 |

REGISTRATION
OF
BIRTHS, MARRIAGES, AND DEATHS
IN
VERMONT.

RETURNED TO THE SECRETARY'S OFFICE FOR THE YEAR
ENDING DECEMBER 31, 1884.

RESULTS AND OBSERVATIONS.

1884

GENERAL SUMMARY.

DURING the year ending Dec. 31, 1884, the whole number of births recorded in the State was 6,665, of which 3,368 were males, and 3,292 were females, 5 unknown. Compared with 1883, the number of births was 106 greater, and with 1882 it was 334. The difference in the proportion of the sexes was 76, in 1883 it was 394.

During the same period, the number of couples married was 2,686, a number less by 150 couples than in 1883, when it was 2,836.

The number of decedents for the same period was 5,233, of which 2,518 were males, and 2,667 were females. Of 48 the sex is not stated. Compared with 1883, the number of decedents was 29 greater, and with 1882 it was 248 less.

The population of the State by the census of 1880 was 332,286. There was, therefore, during the year, one birth to every 50 of the population, against one to every 50.6 in 1883, and one to every 52.5 in 1882. One person in every 61.6 was married during the year, against one to every 73.3 in 1883. There was one decedent to every 63.5 of the population, against one to every 63.8 in 1883, and one to every 60.6 in 1882. These figures indicate an increase of mortality in the State during the last year.

The following table groups together the main facts in the registration of births, marriages, and deaths during the twenty-eight years covered by these reports : —

| YEARS. | Whole No. of Births. | Stillborn. | Living Births. | Marriages. | Deaths. |
|-----------------|----------------------|------------|----------------|------------|---------|
| 1857-1861 . . . | 32,682 | 645 | 32,037 | 11,391 | 18,753 |
| 1862-1866 . . . | 27,512 | 383 | 27,129 | 11,343 | 24,538 |
| 1867-1871 . . . | 36,260 | 828 | 35,432 | 14,109 | 22,318 |
| 1872-1876 . . . | 35,950 | 1,018 | 34,932 | 13,538 | 25,914 |
| 1877 | 7,375 | 197 | 7,178 | 2,615 | 4,992 |
| 1878 | 6,870 | 235 | 6,635 | 2,770 | 4,896 |
| 1879 | 6,843 | 251 | 6,592 | 2,708 | 5,164 |
| 1880 | 6,632 | 228 | 6,404 | 2,697 | 5,260 |
| 1881 | 6,761 | 240 | 6,521 | 2,763 | 5,557 |
| 1882 | 6,331 | 223 | 6,108 | 2,883 | 5,481 |
| 1883 | 6,559 | 211 | 6,348 | 2,834 | 5,204 |
| 1884 | 6,665 | 176 | 6,489 | 2,686 | 5,233 |
| Totals . . . | 184,440 | 4,635 | 181,805 | 72,339 | 133,305 |
| Average . . | 7,825 | 197.3 | 7,575 | 3,013 | 5,554 |

BIRTHS.

In the following table we group together the whole number of births registered in the State during the twenty-eight years, 1857-1884, inclusive, together with the average birth-rate for five quinquennial periods, the annual for two years, population to one birth and number of each sex for the same periods:—

| YEARS. | Whole No. | Average Birth-rate. | Population to 1 Birth. | Males. | Females. | Unknown. |
|-------------|-----------|---------------------|------------------------|--------|----------|----------|
| 1857-1861 . | 32,682 | 2.06 | 48.4 | 16,506 | 15,724 | 452 |
| 1862-1866 . | 27,512 | 1.77 | 56.6 | 14,126 | 13,215 | 171 |
| 1867-1871 . | 34,260 | 2.05 | 45.6 | 18,710 | 17,110 | 440 |
| 1872-1876 . | 35,950 | 2.16 | 45.9 | 18,417 | 17,450 | 53 |
| 1877-1881 . | 32,481 | 2.10 | 48 | 16,139 | 16,251 | 91 |
| 1882 . . . | 6,331 | 1.95 | 52.4 | 3,239 | 3,078 | 14 |
| 1883 . . . | 6,559 | 1.97 | 50.6 | 3,471 | 3,077 | 11 |
| 1884 . . . | 6,665 | | 50.0 | 3,368 | 3,292 | 5 |
| Total . . | 184,440 | | | 93,976 | 89,227 | 1,237 |
| Average . | 7,825 | 2.01 | 49.9 | 3,974 | 3,745 | |

From the above tables it appears that the whole number of living births in the State during the twenty-eight years covered by these Registration Reports, is 184,440, which exceeds the whole number of decedents during the same period by 52,135. These figures indicate an increase of the population of the State of more than 1,000 during the year 1884.

Sex.—The proportion of the sexes born during the year 1884 was 102 males to every 100 females; or, 50.5 males to 49.5 females.

The number of births, and the proportion of births to the population in the several counties, were as follows:—

| Population. | Counties. | Births. |
|-------------|----------------|--|
| 32,792 . . | Chittenden . . | 890, or 1 birth to every 37.1 of its population. |
| 4,124 . . | Grand Isle . . | 108, “ “ 38 1 “ “ |
| 41,824 . . | Rutland . . . | 939, “ “ 43.4 “ “ |
| 7,931 . . | Essex | 177, “ “ 44.8 “ “ |
| 12,484 . . | Lamoille . . . | 275, “ “ 46.1 “ “ |
| 23,607 . . | Caledonia . . | 504, “ “ 46.8 “ “ |
| 22,083 . . | Orleans . . . | 465, “ “ 47.2 “ “ |
| 30,225 . . | Franklin . . . | 616, “ “ 49 1 “ “ |
| 25,404 . . | Washington . | 489, “ “ 51 1 “ “ |
| 21,950 . . | Bennington . . | 423, “ “ 51 8 “ “ |
| 24,173 . . | Addison . . . | 449, “ “ 53.8 “ “ |
| 26,763 . . | Windham . . . | 476, “ “ 56.2 “ “ |
| 35,196 . . | Windsor . . . | 518, “ “ 67 9 “ “ |
| 23,525 . . | Orange | 335, “ “ 70 2 “ “ |

The greatest number of births in one month was in September, when they amounted to 616. Last year, August had the greatest number of births; its total being 636. Next in order are, July, 609; October, 597; August, 588; March, 578; April, 560; November, 547; October, 520; December, 515; January, 505; and February, 436. The number for the third quarter of the year, as in 1883, was the largest. Then follows the second quarter, in which there were 1,670 births; then the fourth quarter, in which there were 1,582; and, finally, the first, in which 1,519 births occurred. The births in the last half of the year exceeded those in the first by 205. In 1883, the number in excess was 571; in 1882, 90. The order of counties was, Rutland, 939; Chittenden, 890; Franklin, 616; Windsor, 518; Caledonia, 504; Washington, 489; Windham, 476; Orleans, 466; Addison, 449; Bennington, 423; Orange, 335; Lamoille, 275; Essex, 177; and Grand Isle, 108.

Plural Births.—The number of plural births reported for 1884 is 73, as against 123 in 1883. Of these, 34 were males, and 39 were females. The largest number of these births, 20, was in Rutland County. Orleans had 12, Windham nine, Orange 8, and Bennington, 6. Addison and Franklin each had 4. Caledonia, Chittenden, Franklin, Grand Isle, Lamoille, and Washington each had 2, while Windsor had none.

Illegitimates.—The whole number of illegitimate births recorded during the year was 55. Of these, 29 were males, and 26 females. In 1883, 53 were recorded, while in 1882 there were 76. Franklin County leads with 10. Last year, Rutland headed the list with 11. After Franklin, follow Bennington and Washington, with 6 each. Caledonia and Orleans had 5 each; Addison and Windsor, 4 each; Orange and Rutland, 3 each; Chittenden and Lamoille, 2 each; while Essex and Windham each had 1. The whole number of these births reported during the twenty-eight years of this registration is 1,509, or about 1 in 128 of all births.

Stillborn.—The number for 1884 is 176, as against 211 in 1883. Of these, 83 are reported as males, 67 as females, and 26 unknown.

Parentage.—4,803 are recorded as of American, 1,574 as of foreign, and 129 as of unknown parentage. In 1883 the number was 4,767 American, and 1,644 foreign. The largest number of births with foreign parentage was in Rutland County, where they amounted to 320, and in Chittenden County, where they numbered 252. These counties, as they are the manufacturing centres of the State, are also the special centres for the foreign population.

MARRIAGES.

The whole number of marriages recorded during the year ending Dec. 31, 1884, was 2,727. This is 109 less than the number of marriages in 1883. Of the persons married, 4,554 are reported as of American, and 803 as of foreign parentage. In 1883 the number was 4,665 of American, and 946 of foreign parentage. Orleans, Franklin, and Chittenden take the lead in marriages among the foreign population, with, respectively, 173, 159, and 121. In marriages among the American population, Rutland with 483, Windsor with 468, and Chittenden with 429, take the lead.

Of the marriages recorded during the year, 2,104 were first marriages of both parties. 104 bachelors married widows, 280 widowers married maids, and 280 were subsequent marriages of both parties. The largest number of marriages, 297, were registered in Franklin County. Rutland County had 287; Chittenden, 279; Orleans, 250; Windsor, 243; Washington, 228; Windham, 225; Caledonia, 201; Addison, 166; Orange, 158; Bennington, 146; Lamoille, 197; Essex, 81; and Grand Isle, 280. The number of marriages by months are as follows: October, 287; November, 279; December, 274; September, 237; January, 222; February, 221; June, 214; August, 213; May, 209; March, 203; July, 181; and April, 176.

DIVORCES.

During the year ending Dec. 31, 1884, the number of divorces granted by the courts of Vermont was 202. The ratio of divorces to marriages in the State was 1 to every 13.29 marriages. Of the "causes of divorce" 30, or a little more than one-eighth, were for "adultery;" 56 for "intolerable severity;" 30 for "desertion, and refusal to support;" 22 for "wilful desertion;" 16 for "desertion;" 12 for "refusal to support;" 5 for "intolerable severity, and refusal to support;" 3 for "adultery and desertion;" 2 for "physical incapacity of libellee." The wife was the libellant in 109 instances, and the husband in 73. The largest number of divorces granted was in Rutland County, where they amounted to 27, or 1 in 10.63 of all the marriages in the county. In Windsor, there were 26, or 1 in 9.35; in Franklin, 25, or 1 in 11.88; in Washington, 19, or 1 in 12; in Caledonia, 17, or 1 in 11.89; in Lamoille, 15, or 1 in 6.47; in Windham, 15, or 1 in 15; in Orange, 13, or 1 in 12.16; in Addison, 12, or 1 in 13.75; in Bennington, 11, or 1 in 13.28; in Chittenden, 11, or 1 in 25.07; in Orleans, 11, or 1 in 22.73.

DEATHS.

The whole number of deaths registered during the year 1884 was 5,236. This is greater by 36 than the number of deaths occurring in 1883, but 245 less than those in 1882. The death-rate for the year was 1.57, nearly, or the same as it was in 1883.

Ages.—The aggregate ages given of all the decedents was 219,615. The average age at death was 43.70. In 1883 the average age of decedents was 43.42. By counties, the average age of decedents was: in Orange, 54.69; in Windsor, 53.64; in Windham, 50.38; in Rutland, 47.39; in Caledonia, 46.35; in Washington, 45.33; in Addison, 44.83; in Franklin, 43.62; in Chittenden, 42.21; in Bennington, 41.47; in Essex, 40.91; in Lamoille, 40.76; in Grand Isle, 36.74; and in Orleans, 23.52.

The decedents under 1 year of age were 724. Deducting the "stillborn," the number of decedents under 1 year of age from disease was 548, or over one-ninth of the entire mortality of the State. The decedents from 1 to 2, were 160; from 2 to 5, 116; from 1 to 5, 323, or about one-sixteenth of the whole number of decedents; from 5 to 10, 118; from 10 to 15, 90; from 15 to 20, 186; from 20 to 30, 457; from 30 to 40, 377; from 40 to 50, 301; from 50 to 60, 412; from 60 to 70, 623; from 70 to 80, 815; from 80 to 90, 576; and from 90 to 100, 95.

The percentage of decedents of both sexes is shown by counties, in the following table:—

| Counties. | Deaths. | Percentage. | Counties. | Deaths. | Percentage. |
|---------------|----------------|-------------|--------------|----------------|-------------|
| Addison . . | { Males, 174 | 1.34 | Lamoille . . | { Males, 79 | 1.07 |
| | { Females, 192 | 1.50 | | { Females, 115 | 1.67 |
| Bennington . | { Males, 163 | 1.47 | Orange . . | { Males, 177 | 1.49 |
| | { Females, 159 | 1.56 | | { Females, 166 | 1.43 |
| Caledonia . . | { Males, 203 | 1.68 | Orleans . . | { Males, 156 | 1.37 |
| | { Females, 212 | 1.81 | | { Females, 188 | 1.75 |
| Chittenden . | { Males, 283 | 1.75 | Rutland . . | { Males, 303 | 1.42 |
| | { Females, 306 | 1.83 | | { Females, 246 | 1.28 |
| Essex . . . | { Males, 53 | 1.27 | Washington . | { Males, 197 | 1.58 |
| | { Females, 63 | 1.67 | | { Females, 214 | 1.66 |
| Franklin . . | { Males, 200 | 1.32 | Windham . . | { Males, 223 | 1.67 |
| | { Females, 194 | 1.20 | | { Females, 254 | 1.89 |
| Grand Isle . | { Males, 32 | 1.54 | Windsor . . | { Males, 275 | 1.58 |
| | { Females, 34 | 1.65 | | { Females, 306 | 1.73 |

Whole number of decedents, — males, 2,518; per cent, 1.47.

Whole number of decedents, — females, 2,667; per cent, 1.61.

Unknown, 48.

Total, 5,233; per cent, 1.57.

Sex.—The number of decedents reported in 1884 was 2,518 males and 2,667 females. The excess of deaths of females over males is 149, as against 72 in 1883, and 90 in 1882.

Season. — The mortality of the State by months is as follows: September, 493; April, 467; March, 455; July, 452; May, 444; October, 443; December, 442; August, 436; June, 433; November, 411; March, 401; and January, 381. In 1883 the order was March, April, August, September, October, December, May, July, November, June, January, and February. The mortality in the State was, in the first six months, 2,581, and, in the last six, 2,677.

CAUSES OF DEATH.

In 1884 there were 788 deaths from zymotic diseases. In 1883 the number of decedents in this class was 869; in 1882 it was 931; so that the decrease of mortality in this class in the three years past is 143. The percentage of deaths in this class is 1.60. In 1883 it was 1.67; in 1882 it was 1.70.

The number of deaths from Constitutional causes was 1,077. In 1883 it was 1,067, against 1,104 in 1882; a slight increase during the three years. The percentage of deaths from Constitutional causes was 2.19. In 1883 it was 2.05; in 1882 it was 2.06. From Local causes there were 2,048 deaths. In 1883 there were 2,005; in 1882, 2,065. In 1884 the percentage was 4.10. In 1883 it was 3.85; in 1882, 3.76. From Developmental causes there were 795 deaths. In 1883 there were also 795; in 1882, 821. The percentage was 1.62. In 1883 it was 1.52; in 1882, 1.49. From Violent causes there were 197 deaths. In 1883 there were 172; in 1882, 186. The percentage was .40. In 1883 it was .33; in 1882, .34. In 328 deaths, the causes were either unknown, or reported in such a way that they could not be classified. The percentage was .60.

In the following table, we group together the number of decedents in the sixteen diseases which caused the greatest part of the mortality during the last three years, in the order of the fatality.

| 1882.
Whole number of decedents,
5,481. | 1883.

LAWS OF VERMONT RELATING TO REGISTRATION.

[Chapter 128 of the Revised Laws of Vermont, and Acts passed since the Revision relating thereto.]

REGISTRATION OF BIRTHS, MARRIAGES, DIVORCES, AND DEATHS.

DUTIES OF SCHOOL-DISTRICT CLERKS.

SECTION 2547. The school-district clerks in each town, or, in towns not divided into districts, the clerk of the school board, shall annually, in the month of January, ascertain the births and deaths which occurred in their respective districts during the year next preceding the first day of January; and shall report to the town clerk on or before the first day of February the date and place of birth of each child, its name and sex, the names and residence of its parents, and the occupation of the father. They shall also report the date, place, and disease or apparent cause of each death, the name and sex of the deceased, whether married or single, his age in years, months, and days, place of birth, the name of his parents, and his occupation if over fifteen years of age.

SECT. 2548. If a district clerk or clerk of school board fails to make the required return, or makes an incomplete or incorrect return, he shall forfeit all compensation therefor, and be fined not less than five dollars; and the town clerk shall forthwith cause prosecution to be commenced against him in the name of the state to recover such penalty.

SECT. 2549. So much of this chapter as relates to the duties of school-district clerks in collecting and making returns of births and deaths shall not apply to the city of Burlington.

DUTIES OF TOWN CLERKS.

SECT. 2550. Town clerks shall carefully examine the returns of births and deaths made to them by the clerks of the several school-districts; and, if the returns are made up and returned agreeably to law, they shall furnish the school-district clerk so complying with the requirements of law a certificate to that effect; and, on presentation of such certificate to the selectmen, they shall draw an order on the

town treasurer to pay such school-district clerk or clerk of school board fifteen cents for each birth or death returned.

SECT. 2551. Town clerks shall number and record in the order in which they are received, the returns of births, marriages, and deaths made to them; and the record shall show the time when it was made. They shall annually, in the month of March, transmit to the secretary of state a certified copy of such record made for the year next preceding the first day of January.

SECT. 2552. The clerk of each town shall receive from the treasury of the town five cents for recording each birth and death, and ten cents a folio for copying the same and the marriage records in his office, for the use of the secretary of state; provided said clerks comply with the provisions of this chapter in all respects.

SECT. 2553. If a town clerk fails to comply with the requirements of law in relation to making returns of births, marriages, and deaths to the secretary of state, he shall be fined not less than twenty dollars.

DUTIES OF COUNTY CLERKS.

SECT. 2554. The clerks of the county courts shall on the last day of December in each year make return to the secretary of state of the number of divorces granted in their respective counties during the year ending on that day.

DUTIES OF THE SECRETARY OF STATE.

SECT. 2555. The secretary of state shall prepare and furnish to town clerks blank forms to be used as books of records, according to the provisions of this chapter; and also blank forms of returns, and shall accompany the same with the necessary instructions and explanations; and the town clerks shall distribute the same as directed by the secretary.

SECT. 2556. The secretary of state shall receive the returns made to him in pursuance of this chapter, and cause the same to be bound in one or more volumes, with indexes thereto; and, with such assistance as is voluntarily rendered by any committee appointed by the Vermont Medical Society for that purpose, prepare therefrom such tabular results as will render them of practical utility, and make a report thereof biennially to the general assembly; and one thousand copies of the report shall be biennially published, bound in cloth. (*Amended by No. 64, Acts of 1882.*)

SECT. 2557. The secretary of state shall cause prosecutions to be commenced in the name of the state, in an action on the case founded

on this chapter, to recover any penalty or forfeiture imposed by the provisions therein whose recovery is not otherwise provided for.

MISCELLANEOUS.

SECT. 2558. A physician who attended upon a deceased person, shall leave with the town clerk a certificate containing the name of the disease or cause of such death within fifteen days after the interment of the deceased; and a medical attendant who fails to give such certificate shall be fined three dollars, for the use of the town where the offence is committed. (*Repealed by No. 63, Acts of 1882.*)

SECT. 2559. When a male resident of this state is married without the state, he shall within sixty days deposit with the clerk of the town where he resides, a certificate embracing the statistics required by law in marriage certificates; and, if he does not deposit such certificate, he shall forfeit not less than ten dollars.

SECT. 2560. The head of a family who moves into, and becomes a permanent resident of, this state, may cause to be recorded in the office of the clerk of the town where such residence is, a certificate of his marriage, embracing the statistics required by law; and may also cause to be recorded the birth of any of his children born without the state, with the statistics relating to such births required by law, and shall make oath to the correctness of such statistics. But such record shall not be returned to the secretary of state.

SECT. 2561. Town clerks shall record matter submitted to them for record under the two preceding sections, and shall receive the same fees for such record as provided by law for similar records.

AN ACT TO REPEAL SECTION TWO THOUSAND FIVE HUNDRED AND FIFTY-EIGHT, CHAPTER ONE HUNDRED AND TWENTY-EIGHT OF THE REVISED LAWS OF VERMONT, ENTITLED "REGISTRATION OF DEATHS."

It is hereby enacted by the General Assembly of the State of Vermont:—

SECTION 1. Section two thousand five hundred and fifty-eight of the revised laws of Vermont is hereby repealed.

SECT. 2. This act shall take effect upon its passage.

Approved Nov. 1, 1882.

AN ACT PROVIDING FOR BETTER REGISTRATION OF MARRIAGES.

It is hereby enacted by the General Assembly of the State of Vermont:—

SECTION 1. The secretary of state is hereby authorized and required to furnish, at the expense of the state, a suitable book for

recording marriages for each town in the state, and forward the same to the town clerk of each town as soon as he is able to do so.

Said books shall be conveniently arranged, with printed blanks corresponding to the marriage certificates that are used, with the proper space underneath for the attestation of the record by the town clerk, and a proper space for an index to each book.

SECT. 2. It is hereby made the duty of the town clerks in the state to keep a full record of the marriages in their respective towns according to the returns of the certificates.

Approved Nov. 17, 1882.

AN ACT RELATING TO THE PRINTING OF THE REGISTRATION REPORT
OF THE STATE.

It is hereby enacted by the General Assembly of the State of Vermont:—

SECTION 1. The secretary of state is hereby authorized and directed to contract for and procure the printing and publication of the registration of births, marriages, and deaths of the state, annually, on or before the first day of October in each year.

SECT. 2. This act shall take effect upon its passage.

Approved Nov. 14, 1882.
